Phone: +91-7415107944

Versatile, high-energy professional with the distinction of executing information technology projects of large Magnitude within strict time schedules and taking leadership position for end-to-end delivery of projects with all Stakeholders.

EXECUTIVE PROFILE

- Over 3+ years of experience as a Business Analyst, specializing in requirement engineering, **feasibility studies**, **requirement elicitation**, **documentation**, and validation ensuring seamless end-to-end delivery and an enhanced user experience.
- In-depth knowledge of **Agile Methodology** & Software Development Life Cycle (SDLC) with thorough understanding of various phases like requirements analysis, design, development, testing & deployment.
- Understanding upcoming work by collaborating with the Product Owner to prioritize features and **user stories**, helping decide which items to focus on in the **product backlog** for the next **sprint**, iteration, or release.
- Analyzing the pain points and providing alternative solutions for the pain points of the existing system along with the mock-ups for the upcoming features.
- **Writing user stories** for each functional feature and grooming those stories with the team.
- Actively working with development team to **analyze** and **refinement** of the user stories and finalizing the requirements, based on the team's **capacity** and **velocity**, prioritize the **product backlog** for the next sprint in the current (**sprint planning**).
- **Definition of Done / Definition of Ready - acceptance criteria** of stories and features from development by taking demos from the team for the current sprint and verifying all the acceptance criteria are in line with the requirement and providing **PO** validation for the stories.
- Expertise in **process analysis**, **system analysis**, **functional design & documentation (FDD)**, **GAP analysis**, **requirements traceability**, **use case analysis and design**.
- Skilled in facilitating **user acceptance testing (UAT)**, **creating wireframes**, and **modeling processes** using **UML** diagrams.
- Exceptional documentation skills for writing **use cases** and **functional requirement documents** as well as for creating **use case diagrams**, **activity diagrams**, **state diagrams** based on UML methodology and **business object modeling flow** diagrams using **MS Visio**.
- Excellent facilitation skills in conducting **walkthroughs**, **surveys**, **questionnaires**, **interviews**, **brainstorming**.
- Diverse experience includes involvement in all aspects of the implementation process/**business process re-engineering** through **AS IS**, **TO BE**, **prototyping**, **wireframes**, realization, development, **testing**, go-live and support
- Creating **product vision document** and **mind mapping document**.
- Subsequent experience in managing a team of **onshore/offshore** model and work closely with multiple teams, developers, and stakeholders.
- Conducting **demo sessions** for the business **stakeholders** and updating release summary and release notes and updating **the business values (BV)** vs **achieved value (AV)** for the features. For each sprint updating if any **risk and dependency** with other teams under release summary.
- Design and review of various documents including the **software requirement specifications (SRS)**, **business requirements document (BRD)**, **use case specifications**, **functional specifications (FSD)**, and **systems design specification (SDS)**.
- Worked closely with product and tech teams to define and document requirements for integrating payment gateways like Stripe, **Razorpay**, and PayPal, covering API flows, security (PCI-DSS), and end-to-end transaction handling.
- Proficient in preparing **Prototypes & Wireframes**, **Mockups**, **UI/UX Design**.

SKILLS

Hard Skills: Requirements Gathering, Project Management, Integration, Business Process Mapping, DFD(Data Flow Diagram) Wealth Management, Retail Banking, LOS, User Acceptance Testing, SWOT Analysis, Process flow, Change management, BPM(Business Process Modeling).

Technical Skills: Business Analysis, Agile (Scrum) Methodologies, SDLC, Business Process Improvement, HTML, CSS, Bootstrap Basic SQL, Unix, Mongo DB.

Tools and Software: Jira, MS Office Suite, SQL Server, MS Visio, Star UML, Figma, Mural, Confluence, Adobe Photoshop, Lucid Chart, Power BI, Swagger, Trello, MS Excel, MS Word, MS Power Point.

Soft Skills: Analytical Thinking, Communication, Problem-Solving, Creativity, Attention to Detail

Employment History

Business Analyst | Info Minds Ltd | London, UK | June 2023 – April 2025

Project: Retail banking (Online Banking) application for leading bank in UK

Role: Business Analyst

Project description:

Developed a retail banking (online banking) application for a leading UK bank. The app allowed users to manage accounts, check balances, transfer funds, and pay bills. It also supported loan applications, transaction history, and customer support features. The platform was accessible via mobile and web, ensuring 24/7 self-service banking. Worked closely with multiple teams to deliver secure, user-friendly functionality. Focus was on improving customer experience and reducing branch dependency.

Responsibilities:

- Led requirement elicitation workshops for a retail banking application serving a prominent UK financial institution.
- Managed and coordinated the efforts of the Business Analyst and user experience team to ensure a timely delivery of artifacts for a successful release.
- Conducted daily stand-up meetings to get updates from the team, helped project manager actively update the project status, detected risks at early stage and took corrective/ preventive actions.
- Developed Power BI dashboards, resulting in a 20% improvement in data visualization and prompt decision making and saving 90 hours.
- Conducted collaboration sessions for cross functional teams and improved collaborations efficiency.
- Mapped user journeys and collaborated with stakeholders to enhance customer experience.
- Defined clear user stories and accepted criteria to support Agile sprint cycles.
- Created Power BI dashboards for monitoring sprint progress, defects occurred during a release, etc.
- Conducted gap analyses and compliance reviews for FCA, GDPR, and PSD2 standards.
- Helped test APIs using Swagger by checking if the responses and requests were working correctly based on the requirements.

Associate Business Analyst | BACentric Solutions | Remote Training | Jan 2023 – March 2023

Project 1: Retail banking

Role: Associate Business Analyst

Project description:

Worked on a retail banking application focused on core features such as customer onboarding, savings and current account management, funds transfer, loan requests, and transaction history. Contributed to documenting business requirements, creating use cases, and validating key functionalities through walkthroughs and test case reviews. Collaborated with cross-functional teams to ensure smooth user journeys and alignment with banking regulations. The project aimed to enhance digital banking capabilities for improved customer experience and operational efficiency.

Responsibilities:

- Assisted in defining user stories and acceptance criteria by understanding product owner requirements and business goals.

- Generated product burn down charts and sprint burn down charts.
- Assisted in planning the sprint meetings which are sprint planning meeting, sprint retrospective meeting, sprint review meeting and daily standup meeting accordingly
- Managed product backlogs and prioritized user stories using MoSCoW techniques for E- Commerce projects.
- Supported key sprint ceremonies, including planning, retrospectives, and backlog refinement.
- Developed process flow diagrams and UML models for core banking systems.

Project 2: Core Banking System

Role: Associate Business Analyst

Responsibilities:

- Assisted in creating a business case document by understanding the problem of the client.
- Gathered requirements from the clients using Elicitation techniques.
- Documented all the requirements (BRD and FRS).
- Assisted in process mapping of key banking operations like customer onboarding, KYC verification, and transaction processing.
- Also performed GAP analysis, SWOT analysis to analyse the project
- Participated in requirement elicitation sessions using techniques like interviews, document analysis, and walkthroughs.
- Assisted in preparing process flow diagrams and use case models using tools like MS Visio or Lucidchart

Business Analyst & Designer Collabera Digital | Pune | May 2022 – Dec 2022

Project: Healthcare & Medical (IBM - Cardinal Health)

Role: Business Analyst And Designer

Project description:

Cardinal Health is a global healthcare services and products company that delivers medical products and solutions to hospitals, pharmacies, and clinics. The project focuses on enhancing the efficiency and accuracy of their supply chain and inventory management system to ensure timely delivery of critical healthcare products while minimizing costs and wastage.

Responsibilities:

- Gather basic business requirements by engaging with users and stakeholders.
- Support meetings through detailed note-taking and communication between business and technical teams.
- Design detailed wireframes, prototypes, and high-fidelity user interfaces for web and mobile applications
- Create and maintain design systems, style guides, and ensure brand consistency across all platforms.
- Designed over 100+ screens in the application and enhanced the overall look and feel.
- Designed applications, enhancing user interfaces and customer engagement.
- Collaborated with Business Analysts team to define functional requirements and acceptance criteria.
- Managed data migration from legacy Oracle databases to GCP, including data mapping and validation of clinical and patient data, ensuring HIPAA compliance and integrity across healthcare applications

Sr. UI/UX Designer & Business Analyst Marlabs Inc | Bengaluru | Aug 2021 – Apr 2022

Project: Pharmaceuticals, Healthcare (Merck)

Role: Business Analyst And UI/UX Designer

Project description:

Merck is a global pharmaceutical and healthcare company headquartered in the United States. This shows Merck's focus on research-driven innovation in vaccines, oncology, infectious diseases, and animal health. It provides information about their products, clinical trials, partnerships, and commitment to global health and sustainability.

Responsibilities:

- **Facilitated workshops and requirement discussions** to capture business needs and convert them into wireframes and design flows.

- Designed wireframes, dashboards, and admin panels for web and mobile platforms, aligning with user needs and business objectives.
- Participated in Agile ceremonies, supported user story creation, and helped define acceptance criteria for development teams.
- Conducted user interviews and research to support feature prioritization and improve product usability.
- Developed UI components and layouts using HTML, CSS, and Bootstrap, ensuring responsive design standards were met.

Previous Roles (UI/UX Designer)

Companies: Ideavate Technologies (2019 – 2021)

Responsibilities:

- Focused on UI/UX design, front-end development, wireframing, and CMS website management.
- Developed UI/UX designs, including infographics dashboards, admin panel, B2B projects, mobile and web screen layouts, contributing improvement in user engagement.
- Engaged in Front-End Development and content writing, leading improvement in product usability & collaborate with developers
- Improved user interface of web screens by blending design elements using HTML , CSS standards

EDUCATION

- 2015 – Bachelor of Engineering (B.E.) with Computer Science, Bhopal, RGTU

CERTIFICATION

- **Trained in IT Business Analyst** through IIBA-endorsed program at BACentric Solutions (IIBA-EEP)
- **Certified Scrum Master (CSM)**

Additional Experience

Barista (Part Time) | Starbucks | London | May 2024 – Oct 2024

- Managed customer interactions and service operations, enhancing problem-solving and communication skills.
- Developed strong customer interaction and communication skills by understanding customer needs and delivering quality service. Gained experience in handling fast-paced environments, multitasking, and problem-solving—skills valuable for stakeholder management and requirement gathering as a Business Analyst.
