EDUCATION

Moradabad Institute of Technology, Moradabad

2020 – 2024

B.Tech - Computer Science and Engineering - **CGPA - 8.4**

Moradabad, Uttar Pradesh

PROJECTS

Historical Sales Data Analysis 🔗 | Power BI, Data Analysis

2024

- Optimized multi-channel sales strategies based on regional performance analysis, resulting in a 25% increase in average order value and a 15% boost in customer retention within the first quarter.

Gesture Controlled Computer System - GCCS 🔗 | Python, Computer Vision, OpenCV

2023-24

- Engineered a Python-based application using OpenCV, Mediapipe, and PyAutoGUI to enable computer control through intuitive hand gestures, enhancing user experience and accessibility
- Team size-4**
- Research Paper-** Gesture Controlled Computer System at International Journal of Engineering Sciences Emerging Technologies, Oct. 2024(yet to publish).

Sentiment Analysis on IMDB Movie Datasets 🔗 | HTML, CSS, Flask, Python

2022-2023

- Developed a sentiment analysis model using Python to classify movie reviews as positive or negative, improving accuracy in understanding audience feedback
- Research Paper-** Sentiment Analysis on IMDB Datasets using ML at International Journal of Engineering Sciences Emerging Technologies, Oct. 2023.

INTERNSHIP

Feynn Labs 🔗

03,2024 - 05,2024

Data Science Intern

Assam, India

- Executed a comprehensive data analysis project on electric vehicles in India by applying clustering techniques; provided actionable insights that informed strategic decisions and projected a market growth over the next 3 years **Done real time project by performing data analysis steps on Electric Vehicles in India.**
- Developed a mobile price prediction website using Python, implementing market segmentation and deriving a financial model from the dataset to enhance pricing strategies.

RSS Division, Bhabha Atomic Research Centre, 🔗

07 2023 – 08 2023

Intern

Assam, India

- Developed software application for online visualization and storage of the geotagged radiation detector data. **Tech Used: Angular, FastAPI(Python), PostgreSQL.**

TECHNICAL SKILLS

Languages: C, C++, JavaScript, SQL, Python, HTML, CSS

Technologies/Frameworks: Angular, Django, AWS, Docker, Git

Developer Tools: VS Code, Jupyter Notebook, PowerBI,

CERTIFICATIONS

- Design and Analysis of Algorithms - NPTEL
- Google Cloud Computing Foundations - NPTEL
- Introduction to Internet of Things - NPTEL
- Python Data Science, AI and Development - Coursera
- Getting started with AWS Machine Learning - Coursera

EXTRACURRICULAR

- Participated in Smart India Hackathon.
- Participated in Flipkart Grid 5.0
