

Girish Jerpoth

Pune, MH

Data Analyst | SQL Developer | ML | 8624000178 | girishjerpoth@gmail.com | [LinkedIn](#) | [GitHub](#) | [My Portfolio](#)

OBJECTIVE

- Detail-oriented Data Professional with strong academic background in Engineering. Proficient in Data Mining, Data Governance Statistical Analysis and Data Visualization. Seeking a Data Analyst role to apply my technical skills and contribute to data-driven decision making that enhances business performance by Data Quality metrics.

SKILLS

- Analytics Tool**:- Power BI, Tableau, Excel, Jupyter Notebook, R, MySQL to perform Data integration Tasks.
- Machine Learning** :- Supervised and Unsupervised Learning Algorithm, Data Preprocessing, Feature Engineering, Hyperparameter Tuning, NLP, DL and methods relevant for Risk Assessment.
- SQL** :- Database concepts, Query Writing, Constraints, Joins, DDL, DML, DRL, DCL, Windows Function, CTE, No Sql (MongoDB, Cassandra), Stored Procedure with an emphasis on relation Databases.
- Power BI** :- Data Models, Power Query, DAX, KPI, ETL tool, Custom visuals
- Python** :- NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, TensorFlow, Beautiful soup, EDA, File Handling adept at Data Profiling.
- Big Data**:- Hadoop-HDFS, Apache Airflow, Hive, HBASE, Apache Spark, Cloud (AWS-EC2 instance) engaged in Data Conversion Process.
- Soft Skill** :- Effective Communication, Solution Oriented, collaboration, critical Thinking, Adaptability and commitment to continuous learning

INTERNSHIP EXPERIENCE

FORGE. (PwC Switzerland Power BI)

Sep 2023-Oct2023

- Developed a data model and visualizations in Power BI, and optimized the report with DAX, which improved the performance of the report by 5%. Ensured compliance with Business Requirement

CODECLAUSE. (Data Science Inter)

Oct 2023 - Nov 2023

- Applied data analysis techniques for feature extraction, followed by machine learning to create highly accurate predictions focusing on Financial Crime prevention
- Gained valuable hands-on experience in machine learning through this project, demonstrating proficiency in problem-solving and utilizing a Modeling Tool for data representation.

ACADEMIC PROJECT

NLP-Based Fake News Detector [Python | ML | NLP] [Link](#)

Aug2023 – Sep 2023

- By analyzing linguistic patterns, extracting key features, and utilizing real-time assessment, our system empowers users to distinguish reliable information from misleading content and Data Governance.
- This solution enhances media literacy, combats disinformation, and contributes to a more credible information landscape. This project endeavor showcases a deep understanding of NLP, Python, Machine Learning, and Data Preprocessing techniques.

Hospitality Revenue - [Power BI] [Live Dashboard](#)

Nov2023 – Dec 2023

- Enhanced revenue growth by implementing Power BI to analyze and optimize revenue metrics, resulting in a 15% increase in revenue for the hospitality industry.
- Pioneered and implemented an innovative, interactive live dashboard to systematically track Revenue Per Available Room (RevPAR) and Average Daily Rate (ADR), revolutionizing the monitoring process. Led a strategic initiative to anticipate and remedy revenue leakage, achieving a remarkable 20% reduction in financial losses while focusing on Data Quality and regional analysis. Led a strategic initiative to anticipate and remedy revenue leakage, achieving a remarkable 20% reduction in financial losses. Assessed popular coffee types among consumers to inform product offerings..

Library Management System- [SQL] [link](#)

Aug2024-Sep2024

- This project demonstrates the implementation of a Library Management System using SQL. It includes creating and managing tables, performing CRUD operations, and executing advanced SQL queries. The goal is to showcase skills in database design, manipulation, Query and Data Governance

EDUCATION

- PG-Diploma in Big Data Analytics.** Sep 2023
C-DAC, Thiruvananthapuram
- Bachelors of Engineering.** July 2019
DBACER, Nagpur
