PROFESSIONAL SUMMARY

A versatile and results-driven Computer Science graduate specializing in the end-to-end development of data-driven software solutions. Experienced in architecting robust backend systems, developing AI/ML models, and building user-centric applications. A proactive problem-solver with a strong foundation in Python, Java, and modern development methodologies, eager to contribute technical skills to an innovative team.

SKILLS

- **Programming Languages:** Python, Java, C
- **Backend & Microservices:** Spring Boot, FastAPI, RESTful APIs, Docker, Docker Compose
- **AI/ML & Data Science:** NLP, Generative AI (Google Gemini Pro), Scikit-learn, Pandas, NLTK
- **Frontend & Data Apps:** Streamlit, HTML/CSS, JavaScript
- **Databases & Big Data:** PostgreSQL, SQLite, Hadoop, Spark
- **Developer Tools & Methodologies:** Git, GitHub, Maven, Postman, Agile, SDLC

EDUCATION

B. Tech in Computer Science(AI and ML) | Centurion University, Vizianagaram 2021 – 2025

INTERNSHIP EXPERIENCE

Artificial Intelligence & Machine Learning Intern at Innovate Intern Dec 2024 – Feb 2025

- Applied analytical problem-solving and team collaboration to contribute to the full development lifecycle of software solutions, from technical design to deployment and troubleshooting.
- Demonstrated proactive learning and initiative by researching emerging industry trends and best practices to inform strategic project direction.

PROJECTS

AgriMarket-Pulse | Java, Spring Boot, Microservices, PostgreSQL, Docker

- Architected a Java-based microservices application using Spring Boot to deliver real-time agricultural commodity price tracking, showcasing strong system design and backend skills.
- Demonstrated project ownership by containerizing the entire backend stack with Docker, improving data processing efficiency by 30% and enabling scalable tracking.

AI Resume Matcher | Python, Streamlit, NLP, Scikit-learn

- Engineered a full-stack screening application with a user-friendly Streamlit UI and a Python/NLP backend, showcasing end-to-end development capabilities.
- Applied analytical thinking to implement an advanced NLP pipeline that improved resume screening efficiency by an estimated 40%, directly solving a common business problem.

Code Iterator AI | Python, FastAPI, Google Gemini Pro, API Integration

- Developed a generative AI coding assistant by integrating the Google Gemini Pro LLM via a lightweight, high-performance FastAPI backend, showcasing innovation and modern API skills.
- Applied creative problem-solving in prompt engineering to create a valuable tool that reduced average developer debugging time by an estimated 20%.

CERTIFICATIONS & SKILL BADGES

- Google Cloud Skill Badges: 6+ badges earned in Generative AI, LLMs, Vertex AI & Prompt Design(2024)
- Python Essentials 2 - Cisco Networking Academy(2024)
- Java course for Placements - CodeTantra (2024)
- Big Data - 301 - Infosys Springboard (2024)
