PROFESSIONAL SUMMARY

- Proficient and solution-oriented **EDI Business Analyst** with **8.5+ years of IT experience**, including **5+ years specializing in EDI integrations and B2B transaction management**.
- Proven experience working with **SPS Commerce**, managing **retailer onboarding, spec creation, mapping validation**, and issue resolution across various transaction sets including **850, 855, 810, 856, 846**.
- Adept at working in **Kanban/Agile environments**, collaborating with cross-functional teams, and delivering high-quality solutions for seamless EDI operations.
- Experience in customer satisfaction, customer handling, customer one to one interaction, customer support.
- Experienced in handling customer setups the requirement of account teams and customer using Agile, Kanban, Scrum and Waterfall.
- Decoding existing maps and making enhancements to them using Map editor.
- Developed and maintained Agile artifacts; Sprint backlog, Product backlog, burn-down chart and Involved in Scrum events such as Backlog Grooming and Story-Point Estimation.
- Facilitated Agile Scrum Ceremonies: Sprint Planning, Daily Scrum Call, Sprint Review and Sprint Retrospective Meetings.
- Competent in understanding Business requirements and breaking them into Epics and Features.
- Proficient in using UML in behavioural, and structural Modelling - created Use Case, State chart diagrams, Activity diagrams, Class diagrams, Sequence diagrams, Process flow diagrams and Data Flow diagrams (DFD) using MS Visio and Rational Rose.
- Performed AS IS and TO BE analysis for documenting Business Requirements Document (BRD), which in turn helps in transforming to Functional Requirements Document (FRD).
- Conducted Gap Analysis, Business process analysis, SWOT analysis and ROI analysis
- Designed and developed Wireframes, UI mock-up screens, Prototypes for better visualization.
- Worked with different business users eliciting business rules and various Functional & Non-Functional requirements.
- Experience in requirements gathering by conducting Joint Application Development (JAD) sessions and Fit/Gap sessions.
- Expertise in Requirement Elicitation techniques. Highly proficient in coordinating with the team and in working with users, stakeholders to elicit the requirements using focus groups, Interviews and Brainstorming sessions.
- Conducted Root Cause Analysis in identifying system gaps and deficiencies that required a business and technical based approach for problem solving.
- Responsible for ensuring smooth delivery of regular executive business AML/KYC presentations/reports and the final outputs for ad-hoc projects KYC enhancements to the onboarding process in conjunction with the understanding and supporting the frontline user and customer experience.
- Implementation of risk rating module to support AML risk.
- Created Requirement Traceability Matrix (RTM) for tracking and managing changes based on project's evolving needs.
- Used JIRA for defect tracking and reviewed them in subsequent iterations of the application development process and facilitated Triage meetings.
- Created workflow scenarios, designed new process flows and documented the business Process and activities of the business from the conceptual to procedural level.
- Experienced designing the Burndown Charts
- Worked with various SQL tools with a working knowledge of relational databases and structure.
- Effectively and accurately communicated relevant project information to the client and project team.
- Trained users on the changes being released and conducted post production activities like getting feedback from users, prioritizing tasks with business users.
- Possess excellent written and verbal communication skills. Responsible, self-motivated and organized.
- Strong knowledge in software testing lifecycle, review and approve test plans and test cases, use of testing tools and Defect tracking mechanism and coordinate Sanity and User Acceptance Test (UAT) activities.

CORE SKILLS

- EDI Transactions: X12 – 850, 810, 846, 856, 855 ETC
- ERP & Integration Tools: SPS commerce tools (Nexus, Customer connection setup, RTS, Transaction Tracker, Transformation designer etc)
- Knowledge of CSV , Netsuite , Flatfiles ,XML , App files, FEDS files.
- Documentation: BRD, FRD, Mapping Specs, Test Plans, UAT Cases

- Customer Satisfaction, Customer support, Customer Management, Customer retention , Customer Experience, Customer Engagement, Stakeholder Management
- Methodologies: Agile, Kanban, SDLC
- Protocols & Formats: AS2, SFTP, XML, X12, EDIFACT
- Retailer Experience: Walmart, Amazon, Target, Costco, Walgreens
- Tools: JIRA, Confluence, MS Visio, SQL, Salesforce
- Agile/Project management tools :Jira, Confluence, Visio , Power BI, SPS tools (Customer connection setup/ Regression testing tools
- Areas of Expertise : Agile Methodologies: Scrum, Agile Ceremonies, Process Improvement, Team Management, Capacity Planning, Servant leadership, Impediments removal, Metrics Tracking etc
- Agile Metrics Sprint Burndown/Burnup, Velocity, Turn Around Time, Variance Report, Epic Burndown, Release Burndown, Escaped Defects, Code Coverage, Failed Deployments, Work Item Age, Blocked Time, Value Delivered
- Agile and testing Tools : Internal Tools (RTS, customer connection , Nexus, FTP, Transformation Tester, Transaction Tracker) etc
- Other Testing Skills : Functional, Regression, System, Integration, FTP testing , map update, Knowledge of Salesforce
- Manage EDI analytics reporting for various transactions for internal and external business team.
 - SPS commerce
 - Netsuite ERP
 - Stakeholder Management
 - People Management
 - Customer Success Operations
 - MidMarket
 - Quickbooks

Certification

Professional Scrum Master (PSM) from Scrum.org

PROFESSIONAL EXPERIENCE

Bristlecone | Client: SPS Commerce | Remote

07/2021 – Present

Project Highlights: EDI integrations and support for major retailers (Walmart, Amazon, Target, Costco) via SPS Commerce Fulfillment.

- Developed detailed business specification documents for EDI documents such as 850 (Purchase Order), 846 (Inventory), 856 (ASN), 810 (Invoice), 855 (PO Acknowledgement) across multiple retailer integrations.
- Identified and resolved mapping issues related to partner-specific custom formats, loops, and segment requirements for leading retailers (e.g., Walmart, Target, Amazon, Home Depot etc).
- Collaborated with development and QA teams in Kanban-based project environments, managing continuous flow of small EDI enhancements and bug fixes.
- Facilitated daily stand-ups, backlog grooming, and Kanban board management in JIRA.
- Measure and monitor's customer's achievement of critical and key performance indicators, reporting both internally and externally
- Created and present strategic account plans for 100% consumption and areas of growth based on customer's short, mid and long term goals
- Conducted end-to-end testing and supported trading partner certification and onboarding activities.
- Created cross-reference documentation between EDI fields and ERP system fields.
- Delivered post-implementation support, including monitoring 997 acknowledgements and failure analysis.
- Resolved recurring 856 ASN failures for a large retail client, reducing errors by 60%.
- Led successful onboarding of 12+ trading partners in under 6 months.
- Built and maintained custom business specifications for 846 and 856 documents.
- Proactively identified missing segments in the retailer mapping and coordinated fixes with developers.
- Enabled smooth flow of PO and ASN documents from ERP to retailer portals via SPS Adapters.
- Acted as a liaison between internal teams and external vendors for ongoing EDI support.
- Reviewed and updated existing mapping specifications based on retailer-specific format changes.
- Supported data transformation and mapping for X12 850/855/810/846/856, ensuring alignment with ERP data structures.
- Provided production support for EDI document via SPS tools.
- Created UAT plans and test cases, and performed defect triage in coordination with QA.

- Supported a hybrid model of Agile and Waterfall, depending on client preferences.
- Supported daily EDI file transmissions, monitored acknowledgements (997), and escalated transmission issues.
- Prepared requirement documents (BRD) for minor enhancements and mapped fields between EDI files and internal systems.
- Worked closely with developers and QA to support testing cycles for EDI workflows.
- Gathered and analyzed EDI requirements from Line of Business (LOB) and retail clients; authored BRD, HLD, and contributed to LLD for transactions including 850 (PO), 810 (Invoice), 855 (PO Acknowledgment), 856 (ASN), 846 (Inventory).
- Worked with SPS Commerce mapping teams to ensure retailer-specific mapping accuracy; identified and resolved mapping errors and segment mismatches for EDI compliance.
- Conducted gap analysis between retailer expectations and system capabilities, coordinated technical fixes, and supported multiple production deployments.
- Created and maintained business specifications and master mapping documents for each transaction type, ensuring consistent data transformation and compliance.
- Supported data flow and mapping validation between EDI systems and downstream financial or inventory applications.
- Led and coordinated Map deployment , wrote and executed EDI specifications document, and documented issues for resolution in JIRA.
- Created Excel-based data trackers, pivot tables, and macros to monitor EDI activity, identify recurring errors, and validate test cases.
- Monitored credit risk batch jobs and daily EDI transactions (especially 850, 856, 810), investigated failures and breach reports, and worked with cross-functional teams to implement fixes.
- Applied Agile Kanban methodology to manage deliverables: facilitated backlog grooming, tracked stories in JIRA, and provided regular status updates to business and technical stakeholders.
- Collaborated with business, QA, and reporting teams to improve data quality and reporting accuracy across trading partner communications.
- Worked closely with customers to resolve issues and help them make their data compliant.
- Created mock-ups for EDI front-end dashboards, authored service specifications, and contributed to system-level documentation supporting web service-based integrations.
- Used CRM (Salesforce) to gather customer information
- Coordinated legacy migration activities including field mapping, validation, and historical data integrity checks.

EDUCATION

- M.Sc. (Comp. Science) SGBAU University – 2012
- BCA SGBAU university- 2010
- H.S.C. - 2007
- S.S.C. - 2005
