Education

COURSE	YEAR	INSTITUTION	CGP/%
MTech, Industrial Engineering and Management	2022-24	Delhi Technological University, New Delhi.	6.86
BTech, Textile Engineering	2017-21	UP Textile Technology Institute, Kanpur.	6.8
Class XII, CBSE	2017	KVS Sector 47 A Chandigarh.	68%
Class X, CBSE	2015	KVS Awantipur, J&K.	77.5%

PROJECTS

Customer Churn Prediction Telco. | Applied Machine Learning | [Link](#)

- Created a ML predictive model to classify potential churn customers based on numerical and categorical features, transformed Categorical features using **LabelEncoder**.
- Performed Exploratory Data Analysis (EDA)** and compared each feature to Churn and No Churn, using different graphs such as pie chart, box plot, scatterplot, count plot etc.
- Data Scaling: normalized numerical features using **MinMaxScaler**.
- Performed **Chi-Squared Test** for feature selection of categorical features and for numerical features **ANOVA Test**.
- XGBClassifier, LightGBMClassifier, RandomForestClassifier, DecisionTreeClassifier, Stack of All 4 Classifiers**, algorithms were used where Stack of all Classifiers performed best with **cross validation score** of 90.88%, **ROC AUC Score** of 83.01% and **F1 Score** of 83%.

Data Analytics / Power BI Dashboard of Blinkit Sales Data | [Link](#)

- Created a sales performance dynamic dashboard using Power BI.
- Utilized **Power Query** to clean and transform raw data into a suitable format for analysis.
- Designed interactive visuals including bar charts, pie charts, and line graphs to display key metrics like total sales, average sales, number of items, and average rating.
- Enhanced data model with **DAX** to enable complex aggregations and real-time calculations for more accurate and insightful reporting.

Movie Review Sentiment Analysis | Natural Language Processing (NLP) | [Link](#)

- Conducted comprehensive **Exploratory Data Analysis** to understand the dataset's distribution and characteristics, creating separate data frames for positive and negative reviews.
- Generated **Word Clouds** for both positive and negative reviews to visualize the most frequent terms and gain insights into common themes and sentiments.
- Implemented data cleaning, including the removal of punctuation and Stopwords.
- Utilized **TfidfVectorizer** to transform text data into numerical features.
- Applied **Logistics Regression, Support Vector Classifier, and K – Nearest neighbour**, where Logistic Regression performed with highest accuracy of **82%**.

Skills and Coursework

Technical Skills	PYTHON (NumPy, Pandas, Tensorflow) SQL (MysSql,PostgreSQL) MSEXCEL , Excel VBA Tableau, Power BI Applied Machine Learning Deep Learning Natural Language Processing Statistical Analysis
Certified Course	Business Analytics using EXCEL: Johns Hopkins University MySQL Tableau Python for Machine Learning & Data Science Masterclass Excel Supply Chain Analytics: Coursera
Academic Courses	Data Analytics Operations Research Logistics and Warehousing Supply Chain Management Statistics
Soft Skills	Critical Thinking, Problem Solving, Teamwork, Effective Communication, Adaptability, Attention to Detail
