Summary

Results-driven Data Analyst and Power BI Developer with a strong foundation in Python, SQL, and machine learning. Experienced in leading data analytics teams and improving conversion rates by 15% through data-driven strategies. Proven ability to develop interactive dashboards using Power BI and DAX to enable strategic decision-making and enhance revenue management.

Education

BE in Computer Science - Savitribai Phule Pune University(SPPU) - SGPA: 8.4	2022 – 2026
HSC - DY Patil College of ASC - Percentage: 84.50	2019 – 2021

Technical Skills and Interests

Languages: Python, Html, CSS, SQL

Date Analysis: Excel, PowerBI, Numpy, Pandas, Matplotlib, Scikit-learn.

Web Development: Flask, Bootstrap, Basic Django

Databases: Relational Database(MySql).

AI & ML: Sk-learn, EDA, Predictive Modeling, LangChain (Agentic AI), LLMs (OpenAI, GroqAI, etc)

Experience

Team Leader — Data Analytics Intern, UptoSkills (Online) March 2025 – June 2025

- Leading a team of 7–8 data analytics interns; responsible for daily task assignment & progress monitoring.
- Conducted data collection, cleaning, visualization, and insight generation using SQL, Excel, and Power BI.
- Contributed to a key analytics project that improved intern conversion by 15% and forecasted 2x growth within 6 months through data-driven outreach strategies.

Projects

AtliQ Hospitality Analysis Dashboard [Link](#)

- Developed a Power BI dashboard with DAX to analyze 1.71B hotel revenue, 57.87% occupancy, and ratings, enabling strategic decisions for AtliQ Grands.
- Utilized DAX in Power BI to visualize revenue, bookings, and occupancy trends, identifying Mumbai as the top contributor (39.1%) for pricing optimization.
- Analyzed hospitality datasets using Excel and Power BI with DAX, creating interactive dashboards with filters to enhance revenue management.

E-commerce Sales Analysis [Link](#)

- Extracted and analyzed sales trends using SQL and Python, improving decision-making efficiency.
- Designed interactive visualizations with Matplotlib and Seaborn, enhancing data interpretation by 40%.
- Technology Used: Python, MYSQL, Pandas, Matplotlib, Seaborn.

Bangalore House Price Prediction (ML) [Link](#)

- Achieved a 80%+ accuracy by developing and deploying a using Linear Regression model.
- Managed data integrity by handling missing values, encoding categorical variables,enhancing quality by 33%.
- Designed and deployed a Flask-based REST API, improving data processing efficiency by 50%.
- Technology Used: Python, Scikit-learn, EDA, Flask, REST API, HTML, CSS.

Certificates

- Excel, Power BI and SQL Mastery Certification from IT Vedant.
- Certification in Python Mastery – Udem ([Link](#)).
- Career Essentials in Generative AI by Microsoft and LinkedIn ([Link](#)).
