PROFESSIONAL SUMMARY

As a passionate and motivated data analyst I am eager to leverage my skills and knowledge to help organization by digging deep into complex datasets to uncover valuable insights that drive business decisions.

WORK EXPERIENCE

Freelancing Data Analyst | Remote

Dec 2024 to Present

- Examined Brazilian sales data for a Lisbon based client, extracting actionable insights to drive business decisions.
- Designed an interactive real time dashboard using power Bi, providing instantaneous access to key Brazilian metrics and trends.
- Performed data-driven forecasting for future planning and calculate key performance metrics to measure success.

Data Analyst Intern | KultureHire, Remote

June 2024 to July 2024

- Analysed the collected Gen Z data using SQL Joins and Aggregate Functions to extract valuable insights to find Gen Z career preferences.
- Utilized Google Forms to gather career goals and learning preferences data for Generation Z.
- Created dynamic Excel and Power BI dashboards, integrating Pivot Charts and Slicers for enhanced data visualization and filtering across sales, customer relations, and finance domains.

Data Analyst Intern | PwC Virtual Case Experience Sweden, Remote

March 2024 to April 2024

- Implemented data quality checks and validation procedures and improve overall data integrity.
- Investigated the data of the call centre using Excel and SQL and detected a rise in call abandonment during lunch hours.
- Conducted comprehensive trend analysis on call centre data, processing 8 months' worth of call records.

Software Engineer Intern | Hyperlink Infosystem, Ahmedabad, India

Jan 2023 to July 2023

- Developed and optimized backend APIs using Node.js and Express.js, improving application scalability.
- Designed and implemented database schemas and data modelling using MySQL & MongoDB, ensuring efficient data retrieval and storage.
- Collaborated with cross-functional teams to translate business logic into SQL queries and APIs, ensuring accurate data delivery for analytics and reporting needs.
- Participated in data validation and quality assurance during backend integration, maintaining data accuracy and integrity.
- Supported data extraction and transformation processes for internal reporting; collaborated with BI teams on data cleansing and structuring activities.
- Created RESTful API endpoints for seamless integration between front-end and back-end systems.
- Enhanced API performance through query optimization, caching systems, and indexing strategies.
- Kept up with industry trends and integrated new technologies into the development process.

AREAS OF EXPERTISE

- SQL:** Data types, Queries, Aggregate functions, Subqueries, Joins, CTEs, Window functions
- Advanced Excel:** Count if, Sum if, VLOOKUP, Index, Match, Macros, Pivot Table, Pivot charts
- Power BI:** Data Reporting, DAX, Data Modelling, Data Cleaning, ETL
- Python:** Pandas, NumPy, Matplotlib, Seaborn, TensorFlow
- Languages & Tools:** JavaScript, C, HTML/CSS, Node.js, Git, GitHub, VS Code, JIRA, Wireframing

EDUCATION

Gujarat University, Ahmedabad, India

Class of 2023

Master's of Science in Information Technology.

Sep. 2021 – Apr 2023

Samarpan Science and Commerce College | Gujarat University of Ahmedabad, India

Class of 2021

Bachelor's of Science in Chemistry

Aug. 2018 – May 2021

PROJECTS

IPL Insights: Cricket Dashboard | Power BI, API

- Built a **Power BI dashboard** using Cricbuzz API to analyze **real-time and historical** IPL match data.
- Implemented **DAX measures** to track key performance indicators such as **strike rates and economy rates**.

- Designed **interactive visuals, slicers, and filters** to enhance match analysis.

User Engagement Analysis for Restaurants | SQL, Python

- Retrieved and analyzed **Yelp data** to study the impact of user engagement on restaurant success.
- Discovered trends linking **review count and ratings** to business performance.
- Applied **data visualization and statistical analysis** for strategic recommendations.

Bank Loan Analysis Dashboard | SQL, Power BI

- Designed an interactive **Power BI dashboard** to analyze **loan distribution trends**.
- Used SQL for **data extraction and transformation**, enabling in-depth financial insights.
- Visualized trends across loan categories, states, and timeframes for decision-making.

COVID-19 Data Analysis | SQL, Tableau, Excel

- Explored relationships such as **Total Cases vs. Total Deaths** and **Infection Rates per Population**.
- Identified **high-risk countries** and performed time-series trend analysis.
- Created **interactive Tableau dashboards** to visualize findings effectively.

CERTIFICATIONS & AWARDS -----

- Get Job Ready: Power BI Data Analytics for All Levels 2.0 – Codebasics
- Excel: Mother of Business Intelligence - Codebasics
- Google Data Analytics Professional Certificate – Coursera
- Accenture North America: Data Analytics and Visualization Job Simulation
- SQL (Basic) – HackerRank
- Bloomberg Market Concepts Certification – Feb 2025
- Data Science Virtual Experience Programme – British Airways – March 2025

INTERESTS AND OTHER ACTIVITIES -----

- Volunteering: Organized and participated in educational and donation camps under NSS.
- Entrepreneurship: Launched and managed an event decoration business, orchestrating 20+ events within 6 months.
