SUMMARY

Passionate data analyst with a solid foundation in **economics**. Skilled in data analysis, visualization, and statistical tools like Python, SQL, Excel, STATA and Power BI. Experienced with large datasets such as NFHS and PLFS. Seeking a data analyst role to drive insights and support evidence-based decisions.

EDUCATION

GOKHALE INSTITUTE OF POLITICS AND ECONOMICS, PUNE	(2023– 2025)
Master of Science (M.Sc.) in Economics	
ST. JOSEPH’S COLLEGE, GORAKHPUR	(2019 – 2022)
Bachelor of Arts (B.A.) in Economics	

SKILLS & CERTIFICATION

- **Software Utilities:** SQL, Python, MS-Excel, R-Programming, Power BI, STATA
- **Analytics & Modeling:** Econometric, Statistical Analysis, Data Visualization, Data Cleaning
- **Soft Skills:** Communication, Teamwork, Project Management, Analytical Thinking, Leadership
- **Certification:** Winter Consulting 2024 – IIT Guwahati

INTERNSHIPS

Field Invigilator Population Research Centre (GIPE), Ministry of Family and Health Welfare	(March’24-May’24)
• Conducted field surveys for a cross-sectional study on pre-surgery information adequacy. • Collected and analyzing patient data to assess communication effectiveness. • Collaborated with healthcare professionals to gather accurate information for analysis.	
Data and Research Analyst CPC Analytics	(May’24-July’24)
• Developed an R Shiny dashboard with JavaScript (JSON) integration for dynamic charts and advanced map visualizations. • Conducted regression and hypothesis testing to analyze nutrition trends and socioeconomic dietary disparities. • Created interactive regional maps (Leaflet/ggplot2/Plotly) to visualize and explore state-wise nutrition insights. • Automated data cleaning (dplyr, tidyr) and visualization pipelines, reducing manual reporting by 50%.	

PROJECTS

India-USA Inflation Analysis Link	(Aug’24-Sep’24)
• Explored India–US inflation and INR/USD exchange rate data using Python • Correlation analysis shows a week relation between inflation(-0.12) and exchange rate(India: -0.34; US: +0.24) • The exchange rate shows an upward trend, indicating a depreciation of the Indian Rupee against the US Dollar • The PPP-based expected exchange rate shows a more rapid increase compared to the actual exchange rates	
Hospital Mortality Prediction Link	(Sept’24-Oct’24)
• Studied 10,000 hospital records using SQL, finding a 6.34% overall mortality rate • Identified ICU patients with stays >1 day had a higher average death probability (8.3%) than shorter stays • Discovered significant correlations between age, comorbidities, and ICU stay length with patient mortality • Patients aged 70+ had ~20% mortality, and diabetics recorded the highest comorbidity death rate at 24.45%	
Prediction of Likelihood of Developing Diabetes Link	(Nov’24-Dec’24)
• Compared ML algorithms (Logistic Regression, Decision Tree, Random Forest) to predict diabetes using patient health records • Performed data cleaning, feature encoding, and SMOTE oversampling, improving class balance from 10:1 to 1:1 • Random Forest outperformed other models with 89% accuracy, 85% precision, and 75% recall on diabetic class • Achieved AUC of 87.47%, revealing HbA1c and glucose levels as strong predictors through correlation analysis	

ACADEMIC WRITING

Impact of Women’s Education on Child Health Outcomes
• Analyzed NFHS-5 data (n ≈ 27,000) to examine the impact of maternal education on infant mortality and malnutrition in India • Found that higher maternal education reduced infant mortality by 47% (OR = 0.53, p < 0.01) and postneonatal mortality by 48% • Higher maternal education had modest impact on malnutrition (OR = 0.86, p = 0.02) • Recommended integrated policy approach combining education, institutional delivery, and ANC/PNC access

LEADERSHIP AND INITIATIVES

- **Events Head**, DGRD Committee, GIPE – Led the planning & execution of sustainability initiatives & academic events
- **Workshop Organizer**, Village Water Plan Development – Coordinated stakeholders and presented community action plans
- **Captain & Winner**, Football Tournament, GIPE (2024) – Led team strategy and performance under pressure
