## EDUCATION

|                                          |                   |
|------------------------------------------|-------------------|
| ITM Business School                      | Navi Mumbai       |
| PGDM: Business Analytics, 82%            | 06/2023 - 06/2025 |
| Veer Bahadur Singh Purvanchal University | Jaunpur           |
| Bachelor of Science, 65%                 | 06/2019 - 07/2022 |

## TECHNICAL & BUSINESS SKILLS

**Programming Languages:** Python (Pandas, NumPy, Matplotlib, Seaborn), R

**Data Visualization Tools:** Power BI, Tableau, Advance Excel

**Databases & Query Languages:** SQL (MySQL, SQL Server)

## PROFESSIONAL EXPERIENCE

|                            |                   |
|----------------------------|-------------------|
| Kotak Education Foundation | Mumbai            |
| Data Analyst Intern        | 04/2024 – 09/2024 |

- Collaborated with program heads and **education stakeholders** to define **performance KPIs** across **20+** schools
- Developed **Power BI dashboards** for schools in Andhra Pradesh, improving student performance by **17%** and moving **41%** from remedial to excellent
- Conducted **SQL-based analysis** on Rajasthan's **28.09%** student-teacher gap to support school expansion planning
- Led retrospective analysis on UMANG intervention: D2B increased from **44.5% to 56.3%**, TOT from **44.76% to 51.26%**
- Cleaned and matched dropout data using Python with **80% accuracy**, standardizing records from **319,989 schools**
- Delivered weekly insight reports to senior leadership teams for strategic decision – planning

**Skills Used:** Power BI, SQL, Python, KPI Tracking, Stakeholder Collaboration, Process Optimization

|                                    |                   |
|------------------------------------|-------------------|
| Kotak Education Foundation         | Mumbai            |
| Business & Research Analyst Intern | 12/2023 – 01/2024 |

- Cleaned and visualized data from **5,000+ single-teacher schools** using SQL and Excel with **98% accuracy**
- Contributed to **BRD-style documentation** and functional requirement tracking to support stakeholder alignment
- Designed **Excel dashboards**, reducing **reporting time by 30%** and enhancing clarity for academic teams
- Conducted performance trend analysis and built standard templates to support intervention strategies
- Supported strategic discussions with academic heads through research briefs and data-backed recommendations

**Skills Used:** Excel, SQL, Trend Analysis, Data Visualization, Insight Communication

## PROJECTS

|                                                    |                   |
|----------------------------------------------------|-------------------|
| Flight Price Prediction   Python, Machine Learning | 01/2025 – 02/2025 |
|----------------------------------------------------|-------------------|

- Developed a Random Forest regression model ( **$R^2 = 85\%$** ) to predict flight prices from **10,000+** historical records
- Identified pricing levers and recommended dynamic pricing strategies using data insights

|                                                |                   |
|------------------------------------------------|-------------------|
| blinkit Sales Analysis   Power BI and MS Excel | 06/2024 – 07/2024 |
|------------------------------------------------|-------------------|

- Analysed **\$1.2M+ sales** data to identify key revenue drivers (64.6% high-fat products, 42.3% from large outlets)
- Built interactive dashboards showing trends by outlet and product mix
- Identified **25.8%** market growth potential in Tier 3 cities using **segmentation analysis**

|                                                                     |                   |
|---------------------------------------------------------------------|-------------------|
| E-Commerce Operations Analysis (Brazil, 2016-2018)   Python and SQL | 05/2024 – 06/2024 |
|---------------------------------------------------------------------|-------------------|

- Evaluated **100K+ order records**, boosting revenue by **28%** and retention by **62%**
- Automated data transformation (ETL) using Python and SQL for more efficient operations
