

Huda Shaikh

✉ hudashaikh.gp@gmail.com ☎ +91 9975741019 📍 Nagpur, Maharashtra

Professional Summary

Enthusiastic Data Analyst skilled in Python, SQL, Power BI, Tableau and Excel. Experienced in data analysis, visualization, and database management. Currently pursuing a Data Analytics course from IIM Skills and eager to support data-driven decision-making.

Experience

Data Analytics Job Simulation

Deloitte | Virtual

2025-04 – 2025-05

- Analyzed simulated forensic datasets using advanced Excel techniques, classifying 5,000+ records in under 8 hours to identify 15 high-risk fraudulent transactions.
- Developed interactive Tableau dashboard visualizing key performance indicators (KPIs) from simulated business data, providing actionable insights to a team of 5 resulting in a projected 10% efficiency gain.
- Leveraged data mining and statistical analysis on a simulated customer dataset to identify customer segmentation, directly informing targeted marketing strategies projected to increase conversion rates by 8%.

Data Analyst & Visualization

Accenture North America | Virtual

2024-10 – 2024-10

- Modeled and analyzed 7 marketing datasets encompassing 1M+ data points, uncovering content trend insights that influenced a hypothetical social media client's strategy, projecting a 15% increase in user engagement.
- Cleaned and preprocessed large marketing datasets using Python (Pandas), reducing data inconsistencies by 20% and enhancing analytical accuracy, resulting in a 5% improvement in model performance.
- Presented data-driven insights via a comprehensive PowerPoint deck and video presentation to stakeholders, leading to a 10% reduction in decision-making time and facilitating faster implementation of strategic recommendations.

Projects

Marketing Campaign Effectiveness Analysis

- Analyzed 100,000+ rows of marketing data using SQL to evaluate conversion rates, click-through rates (CTR), and return on investment (ROI), identifying underperforming campaigns responsible for 20% of budget wastage.
- Cleaned and processed data using Pandas, pinpointing the top 10% of campaigns delivering the highest ROI, leading to a recommended resource reallocation strategy projected to increase overall ROI by 18%.
- Segmented customer data by engagement and demographics, revealing that 35% of highly engaged users originated from targeted email campaigns, leading to a projected 18% increase in ROI for future campaigns through optimized targeting.

Customer Satisfaction Analysis

- Cleaned and processed 5,000+ rows of customer feedback data in Excel, improving data quality by removing 15% of inconsistencies and enabling more accurate analysis.
- Developed Power BI visualizations to analyze customer sentiment, top concerns, and service quality across multiple regions, resulting in a 20% increase in understanding of key customer issues and driving targeted improvement initiatives.
- Suggested data-driven strategies that, when implemented, led to a projected 15% improvement in customer satisfaction, based on predictive modeling and analysis of key feedback drivers.

Skills

SQL	Excel	Power BI	Tableau
Python	R	Data Analysis	Data Modelling
Data Manipulation	Data Visualization		

Education

Rashtrasant Tukdoji Maharaj Nagpur

Bachelor of Technology in Electronics and Telecommunications

2021 – 2024

Government Polytechnic, Nagpur

Diploma in Electronics and telecommunications

2017 – 2020
