EDUCATION

Vellore Institute of Technology, Bhopal

Bachelor of Technology in Computer Science

CGPA: 8.13

Sep 2021 - Jun 2025

Stepping Stone Inter College, Gorakhpur

Intermediate (CBSE)

Percentage: 79.65

Apr 2020 - May-2021

TECHNICAL SKILLS

Languages: Python, SQL

Frameworks: Pandas, Numpy, Matplotlib, Seaborn

Developer Tools: PowerBI, MySQL, Excel

EXPERIENCE

Data Analyst Intern

Jun 2024 – Sep 2024

Logitok

Remote

- Analyzed and managed sales data for transported products to derive insights supporting business decisions.
- Performed EDA to uncover trends and anomalies in shipment performance.
- Built interactive Power BI dashboards using DAX to track KPIs like Shipment Completion Rate.
- Conducted seasonal analysis to identify peak (April) and low (January) shipping periods.
- Diagnosed October shipment drop due to address errors, recommending operational improvements.

PROJECTS

Customer Churn Analysis | *Python, Numpy, Matplotlib, Seaborn*

Oct 2024 - Nov 2024

- Analyzed customer churn trends using Python and its libraries, focusing on contract types, payment methods, tenure, internet service, and demographics.
- Identified high churn rates (42% for month-to-month contracts, 45% for electronic check users) and key risk factors.
- Discovered that fiber optic users (30% churn) and senior citizens (41% churn) had elevated churn, prompting targeted retention strategies.
- Outcome: Enabled data-driven strategies for customer retention by uncovering patterns influencing churn

Zomato Analytics Dashboard | *Power BI, Power Query, Excel*

Jan 2024 – Feb 2024

- Built an interactive Power BI dashboard to explore Zomato's performance across 822 cities, using Power Query to clean and shape raw data for analysis.
- Visualized key metrics like sales trends, order volumes, and user engagement to uncover regional patterns and help identify high-performing cities.
- Segmented food categories into veg, non-veg, and others, enabling targeted marketing insights and helping improve customer satisfaction.
- Outcome: Helped translate complex data into clear insights for better business decisions on city-wise growth and customer preferences.

Sales Insights (AtliQHardware) Data Analysis | *MySQL, Power BI, Excel*

Apr 2023 - Jun 2023

- In this project, I performed a comprehensive data analysis on sales performance to gain insights into revenue, sales quantities, and profit margins across various markets and products.
- Analyzed 142M total revenue and 350K sales quantity using Power BI and SQL, identifying key trends across markets and products.
- Identified top-performing customer (Electricalsara Stores – 46.2% revenue contribution) and key markets (Delhi NCR – 54.7%, Mumbai – 14.2%).
- Outcome: Delivered actionable insights for sales optimization and strategy refinement.
