EXPERIENCE

Data & QA Analyst Intern, DemandX

05/2025 – Present | Remote

- Tagged & analyzed 300+ data points weekly, monitoring lead quality, ensuring data accuracy and quality.
- Created and maintained reports in Google Sheets utilizing charts, pivots and formulas.
- Carried out Root Cause Analysis (RCA) on 5-7 datasets per week, identifying behavioural patterns & performance drivers behind week-over-week changes, tracking KPIs.
- Delivered data-backed insights & suggested optimizations, contributing to a 15-20% improvement in lead qualification accuracy & client case suitability.

Project Trainee - Data Analytics,

06/2024 – 07/2024 | Angul, India

National Aluminium Company Limited (NALCO)

- Analyzed & visualized yearly, quarterly and weekly trends in power generation, reducing manual reports.
- Calculated power losses and efficiency rates, uncovering a gap of 10% in efficiency in certain sectors.
- Compared distribution costs with revenue, identifying 12% revenue gap in underperforming sectors.
- Conducted data-driven decision-making to optimize operational costs and enhance resource allocation.

Data Science Intern, AICAN Private Limited

07/2022 – 08/2022 | Remote

- Performed exploratory data analysis (EDA) on an automobile dataset to study price influencing factors.
- Pre-processed data to enhance model performance and reliability. End result - a predictive model with an impressive 91% accuracy rate.

PROJECTS

Tokyo Olympics Data Analysis

- Built an end-to-end ETL data pipeline for Olympic datasets using Azure services including Databricks and ADLS.
- Performed data transformation with Spark & implemented SQL-based EDA in Azure Synapse to extract insights on athletes, teams, and medals.

COVID19 Analytics and Viz

- Explored ~5 lakh datapoints using advanced SQL queries like joins, CTEs, etc. to uncover global and country-specific pandemic patterns.
- Created interactive Tableau dashboards to visualize infection and death trends.

Dashboards - Power BI and Tableau

- Showcased legacy of Pixar over 30 years, modeling 5+ tables, utilizing charts, filters and DAX measures 
- Solved influencer ROI visibility by building a Tableau dashboard with ROAS/iROAS metrics and multi-platform campaign analytics over 10K+ data points. 

SKILLS

Programming & Databases — Python (Pandas, NumPy), SQL, R, JavaScript |

Data Analytics & Machine Learning / AI — MS-Excel, Google Sheets, NLP, Deep Learning (TF, PyTorch, Scikit-Learn), EDA, Statistics, APIs, Azure, ETL, RCA, Google Analytics | **Visualization & BI Tools** — Matplotlib, Seaborn, Tableau, Power BI | **Other Skills** — Analytical thinking, Communication, Problem-solving, Collaborative, Attention to detail, Research

EDUCATION

Bachelor of Technology, Computer Science & Engineering, Central University of Haryana

2021 – 2025 | Haryana, India

CGPA: 8.26/10

CERTIFICATIONS

- Machine Learning Specialization – Coursera 
- Google Data Analytics Professional Certificate - Coursera 
- Data Analytics with Python - NPTEL 
- Data Visualization with Power BI - Great Learning 
- Advanced R Programming for Data Analytics in Business - NPTEL
