Professional Experience

Business Analyst| DhanInfo Nagpur

October 2021 – November 2024

Project- Safeguard Property Insurance, USA – Mortgage Loan

- Analyzed mortgage loan servicing processes to ensure compliance with property preservation regulations. Gathered and documented business requirements (BRD, FRD) for property maintenance and loan management systems efficiently.
- Collaborated with stakeholders, vendors, and technical teams to enhance system functionalities for tracking inspections, repairs, and payments.
- Developed and maintained dashboards and reports to monitor property preservation and mortgage loan payments.
- Facilitated the implementation of payment processing solutions for property maintenance expenses and vendor transactions.

Responsibilities

- Elicited and translated business requirements into User Stories, BRD and FRD
- Conducted Gap Analysis, Scope Analysis, and Impact Analysis on business processes using techniques such as Use Diagrams (UML), Context Diagrams (DFD), BPMN (Process Modeling), and Flowcharts.
- Perform **AS-IS and TO-BE Analysis** to identify improvement opportunities and propose fit-for-business solutions by designing effective change strategies.
- Organized and lead **requirement gathering (elicitation) sessions** using techniques like Interviews, Questionnaires, Interface Analysis, Brainstorming, and Focus Group Discussions.
- Translate business requirements into clear and actionable data and process models for easy understanding by stakeholders.
- Create **wireframes and mockups** to visualize system functionalities and enhance user experience.

Project- Online Store for Handmade Jewelry

- Conducted **market research and competitor analysis** to define product positioning and pricing strategies.
- Integrated **secure payment gateways** (Razor pay and credit/debit cards) to ensure seamless transactions.
- Developed **dashboards and reports** to track sales, customer behavior, and payment trends.
- Assisted in the implementation of **inventory management** and order fulfillment systems for efficient operations.
- Provided actionable insights to optimize **website performance**, enhance user experience, and drive sales growth.

Responsibilities

- Performed Requirement Gathering, Gap Analysis, and managed Change Requests.
 - Prioritized Requirements using MOSCOW.
 - Worked closely with stakeholders to understand project scope and perform business analysis.
-
