EDUCATION

Degree	Stream	University/School	Year	Percentage /CGPA
Dual Integrated Degree B. Tech. + MBA	Computer Engineering, Business Analytics	Narsee Monjee Institute of Management Studies (NMIMS)	2019- 2024	3.33/4
HSC	PCM	Holy Cross School	2019	66.4
SSC	-	Agrawal Public School	2017	79.8

SKILLS

- Python, SQL, Power BI, Tableau, Figma, Microsoft Visio, draw.io
- JIRA, Microsoft Excel, Word, PowerPoint
- Requirement Gathering & Elicitation, Process Modeling, Wireframing, Workflow Designing, Documentation, Stakeholder Management, Well versed with SDLC Methodologies (Waterfall, Agile).
- Team Player

WORK EXPERIENCE

Company	Algambo Internet Private Limited (ReaderClub)
Serving Period	May 2023 – September 2023
Roles & Responsibility	- Business Analyst - Conducted n-depth business process analysis to identify gaps and opportunities, aligning process improvements with organizational goals. - Partnered with stakeholders to define functional requirements and design user-friendly workflows using Microsoft Visio and Figma. - Conducted SQL-based data analysis to identify key operational inefficiencies, recommending process optimizations that improved efficiency by 15%. - Created Power BI dashboards for tracking KPIs, improving real-time decision-making and increasing project accuracy by 10%. - Authored detailed business requirement documents (BRDs) and functional requirement specifications (FRDs) to align development with stakeholder needs.

Company	Kulturehire
Serving Period	January 2023 – March 2023
Roles & Responsibility	- Business Analyst - Assisted in gathering and analyzing project requirements through discussions with stakeholders, ensuring the delivery of solutions that met business objectives - Worked on a project “India manager problems “, where aim was to Gather and standardized the information as well created a interactive Power BI dashboard to visualize the data and create an insights report work on the India manager

	problems dataset. - Conducted a root cause analysis of workflow bottlenecks, recommending solutions that streamlined processes and enhanced resource utilization by 25%. - Created detailed process diagrams and wireframes to visualize solutions, facilitating stakeholder approval. - Identified 3 critical managerial challenges responsible for 60% of operational inefficiencies, enabling leadership to implement targeted interventions to improve team performance.
--	--

Company	TechMihirNaik Group
Serving Period	May 2022 – July 2022
Roles & Responsibility	- Frontend Developer - Designed and implemented visual elements using Figma, HTML and CSS for websites and web applications. Ensured that the user interface is visually appealing, intuitive, and user-friendly. - Tested and debugged front-end code across multiple platforms and devices, improving compatibility and overall user experience. - Conducted requirement elicitation through stakeholder interviews and structured workshops, contributing to the early stages of the SDLC. - Experience with end-to-end project phases, including requirement gathering, design, development, testing, and deployment.

ACADEMIC PROJECTS

- E-Commerce platform to connect online vendors:** Spearheaded development using **Agile SDLC** methodologies, focusing on iterative improvements through customer feedback. Designed system workflows using **JIRA** and presented wireframes for the platform's user interface.
- Assessment of different features of Zomato by Data Mining:** Used data mining tools to study several features of Zomato and to extract meaningful insights about customer preferences and trends. **Proposed** Developed a **Data Flow Diagram (DFD)** for Zomato's supply chain integration to implement blockchain technology for fraud prevention.
- Sentimental Analysis of Product Review:** Developed an SRS document outlining the functional and non-functional requirements of the project. **Applied NLP techniques to process** and analyze text data from product reviews.

CERTIFICATIONS

- Agile Software Development (TCS).
- SQL for Beginners (Udemy).
- Getting started with Power BI Desktop (Coursera).
- Python for Data Science (EDX).

ACHIEVEMENTS

- Second Position in the Project development during Agile Software Development workshop organized by TCS.
- First Position in the Udaan-Inter College Competition.
- Second Position in the Sci-Tech Quiz.

HOBBIES & INTERESTS

- Dancing, Cricket, Sketching and Painting
