EDUCATION

2019 – 2023

Sri Shakthi Institute of Engineering and Technology, Anna University

India, Cbe

Bachelor of Engineering in ECE

EXPERIENCE

Mar 2025

Full Time

Freelance Software Developer | Sayvai Software

Coimbatore, Tamil Nadu

Remote

AI-Powered Business Solutions:

- Created a website for Sayvai, a startup company, giving them an online presence. I'm also developing another website for a boys' PG, featuring a fresh and modern design with an integrated virtual chat assistant that is currently being trained to understand user prompts.
- Actively integrating advanced AI features to enhance operational efficiency, supporting Sayvai's goal of delivering impactful industry solutions.

Nov – Feb 2025

Full Time

Independent freelance

United Kingdom

Remote

Helio - Discord Adventure Chatbot:

- Co-developed an interactive Discord bot with a global economy and virtual pet system, created a codex/catalogue commands that lists information about each item. Codex supports navigation, pagination, filtering, and sorting to help find and learn about various items.
- Integrated a dynamic marketplace for trading items and a pet collection feature with 200+ unique pets, enhanced by a website: <https://helio.gg>.

May – July 2024

Full Time

FluxionSoft Co., Ltd

Seoul, South Korea

Contributed to two LG chatbot projects using Vue.js:

- Developed modules for diagnosing common technical issues, reducing resolution time.
- Contributed to the development of a service chatbot aimed at troubleshooting and assisting customers with post-purchase support.

PROJECTS

Dec 2023

Hiro Telegram Bot

Node.js / Telegram API / Flask / Scikit-learn / MongoDB

Built an intelligent Telegram chatbot that helps users manage work and break sessions efficiently. Integrated a Flask-based ML API using Scikit-learn for emotion classification from MongoDB-labeled text data. Currently enhancing with NLP features to deliver context-aware prompts.

July 2022

Face 2 Face

TypeScript / Next.js / Node.js

Developed a web application for a local salon to bolster their online presence and streamline customer interactions. Built with a modern tech stack for speed, scalability, and responsiveness.

Jan 2024

Artwork Web Page

Next.js / Cloudinary (backend) / Next-Auth (OAuth 2.0)

Developed a platform for our community where members can submit artwork and music for competitions. Integrated dedicated sections for each category and user-friendly features to streamline the submission process, along with authentication.

CERTIFICATES & COURSES

2023

Certified Course on ICT Academy

ICT Academy

Completed a course and project from ICT Academy. Maintained consistency throughout the course and completed it successfully with a score of 93/100. Certificate available [here](#).

2022

IBM Certified Project

Built an IoT app using Watson, Swift, and Node-RED through IBM Developer Skills Network. Certificate available [Click Here](#).
