EDUCATION

- **Integrated Masters (BTech + MTech) of Technology in Computer Science** (2021 - 2026)
and Engineering with Specialization in Artificial Intelligence and Machine Learning
Cumulative GPA - **8.61**, VIT Bhopal University, Bhopal, M.P.

SKILLS

- **Programming:** Python, C++, Git, HTML, CSS, MySQL
- **Libraries and Frameworks:** Numpy, Pandas, Matplotlib, Scikit-Learn, LangChain
- **Tools and Platforms:** Jupyter Notebooks, VS Code, MS Office, Google Cloud Platform (GCP)

PROJECTS

GuestGazer

Tech Stack: GCP, Pandas, NumPy, Scikit-learn, PyYAML, MLflow, Flask, Docker, Jenkins, GitHub

- Architected a comprehensive MLOps pipeline leveraging Jenkins, Docker, and Google Cloud to facilitate seamless model deployment, automation, and monitoring for hotel reservation predictions.
- Developed a robust machine learning forecasting model with Scikit-learn and MLflow that enhanced the accuracy of booking cancellation predictions, informing strategic revenue and marketing decisions.
- Deployed the predictive system as a scalable Flask API on Google Cloud Run, enabling real-time insights and operational efficiency through containerization and cloud integration.

MediVoxAI

Tech Stack: Python, Groq, OpenAI Whisper, Llama 3 Vision, gTTS, ElevenLabs, Gradio

- Engineered a multimodal medical chatbot leveraging Llama 3 Vision to analyze patient voice commands and medical images for interactive healthcare assistance.
- Integrated OpenAI Whisper for accurate speech-to-text transcription and combined gTTS/ElevenLabs technologies to produce natural, empathetic voice responses, resulting in a more engaging patient experience.
- Developed an intuitive web-based user interface with Gradio that streamlined multimodal interactions, increasing accessibility for users and reducing interaction.

EcommerceIQ

Tech Stack: Python, MySQL, SQLite, LangChain, Streamlit

- Designed an intelligent chatbot leveraging large language models (LLMs) to accurately convert conversational questions into database queries, enhancing the efficiency of e-commerce data analysis.
- Implemented versatile database connectivity with SQLite and MySQL, enabling seamless integration and reliable management of sales data across platforms.
- Facilitated data-driven decision-making by delivering instant insights on sales trends, customer behavior, and product performance through an intuitive question-and-answer interface.

CERTIFICATIONS

- GitHub Foundations Certification – GitHub
- Machine Learning Specialization – Coursera

EXTRA-CURRICULAR ACHIEVEMENTS

British Airways Data Science Job Simulation – Forage

- Conducted sentiment analysis on customer reviews to build a predictive model for purchase behavior.
- Demonstrated business insight into customer satisfaction and loyalty factors.

CO-CURRICULAR ACHIEVEMENTS

Member, Data Science Club – VIT Bhopal

- Coordinated workshops, seminars, and coding events to foster community engagement in AI/ML.
