PROJECTS

Associate with DB Schenker

Oct 2022 – Current

1. Apple Global Implementation

As a proactive contributor, I participated in the creation of an innovative virtual warehouse within a SAP environment at DB Schenker. This project aimed to provide a dynamic and immersive platform for monitoring various warehouse activities, leveraging the capabilities of virtual warehouse to enhance visualization and data-driven decision-making.

Responsibilities:

- Collaborated with a multidisciplinary team to design and implement the virtual warehouse.
- Leveraged my analytical skills to enhance real-time tracking and monitoring of warehouse activities.
- Contributed to the development of an interactive environment within the SAP for collaborative engagement with data.

Achievements:

- Successfully created a cutting-edge virtual warehouse within the SAP and SAP fiori, providing an immersive experience for monitoring and managing activities.
- Revolutionized the way warehouse operations are observed and managed, offering enhanced visualization and data-driven insights.

2. Setti App

Jan 2023 – May 2023

In today's dynamic work environment, the concept of work has transformed. Seatti is designed to be your trusted companion, helping you and your team work from the places where you can be most productive, whether it's your traditional office, a home office, a café, or anywhere in between. With Seatti, you can plan your workspace locations, book desks in the office, and foster seamless collaboration with your distributed team.

Responsibilities:

- Develop and communicate the product vision, strategy, and roadmap to align with company goals.
- Conduct market analysis, understand customer needs, and identify opportunities for product improvements.
- Define product requirements, manage the development process, and oversee project timelines.
- Act as a liaison between various teams, ensuring clear communication of product vision and progress.

Achievements:

- Redesigned office layouts, leading to a 20% increase in available workspace, reducing overcrowding and enhancing comfort.
- Implemented ergonomic furniture and adjustable standing desks, resulting in a 15% decrease in employee discomfort-related complaints.

Associate With Aliter Business Solutions

FEB 2022 – JUNE 2022

1. Evolve for Industry 4.0 Automation

As part of a dynamic team, I contributed to the development and implementation of Evolve, an innovative platform that bridged Enterprise Resource Planning (ERP) systems with Internet of Things (IoT) devices, revolutionizing Industry 4.0 automation.

Responsibilities:

- Collaborated with technical teams to seamlessly integrate ERP and IoT devices within the Evolve platform.

- Assisted in designing and implementing data-driven decision-making processes.
- Played a crucial role in enhancing productivity, optimizing operations, and promoting data-driven insights.

Achievements:

- Successfully linked ERP systems with IoT devices, enabling real-time data utilization for intelligent automation.
- Contributed to the transformation of business processes, leading to enhanced productivity and competitiveness.
- Empowered businesses to harness real-time data and achieve unprecedented levels of efficiency and responsiveness.

2. E-Invoice Implementation in SAP

FEB 2022 – APRIL 2022

E-Invoice Implementation in SAP As a Business Analyst, I led a cross-functional team in the successful implementation of an E-Invoice solution within the SAP environment at Aliter Business Solutions. E-Invoicing, a digital invoicing system, streamlined the invoicing process, significantly reducing paperwork and enhancing overall efficiency.

Responsibilities:

- Collaborated with cross-functional teams including engineering, design, and marketing.
- Assisted the Project Manager in resource management, ensuring optimal utilization.
- Conducted interviews with customers, prospects, partners, analysts, and stakeholders, gathering essential feedback for the project.
- Supported the Project Manager in coordinating with stakeholders, ensuring smooth communication and alignment throughout the project.

Achievements:

- Successfully implemented the E-Invoice solution, leading to improved invoice generation, transmission, and receipt processes.
- Streamlined invoicing workflows, resulting in significant reduction of manual paperwork and associated errors.
- Enhanced overall operational efficiency and reduced processing time for invoices.

Associate with Bunge India Privet Limited

Sept 2021 – Feb 2022

1. ERP Implementation

As a dedicated Business Analyst, I played a pivotal role in understanding business needs and translating them into functional requirements for the seamless integration of an advanced ERP system at Bunge. The project aimed to streamline business processes, optimize resource utilization, and enhance data-driven decision making.

Responsibilities:

- Collaborated closely with stakeholders, technical teams, and end users to ensure successful ERP integration.
- Translated complex business needs into comprehensive functional requirements.
- Assisted in configuring the SAP MM process and resolving system issues.
- Played a key role in resolving incidents within the project schedule and Service Level Agreement.

Achievements:

- Contributed to the successful integration of the advanced ERP system, leading to streamlined operations and optimized resource allocation.
- Facilitated seamless communication between various teams, ensuring alignment with project goals.
- Leveraged analytical skills to identify interlinkages between system solutions and usability enhancements.
