EDUCATION

Vellore Institute of Technology, Bhopal

2021-2025

Bachelor of Technology Bio-engineering

CGPA - 9.08

TECHNICAL SKILLS

Programming Languages and DSA: Java, Python

Libraries and Tools: MySQL, Visual Studio, MS Excel, MS Word

Web Development: JavaScript, HTML, CSS, Node.js

Concepts and Frameworks: OOPs, DBMS, Computer Networks, Operating System, Introduction of Problem Solving and Programming in Python, Bio-statics, Engineering Design and Modelling, SDLC, AGILE METHODOLOGIES

Soft Skills: Effective Communication, Team Collaboration, Fast Learner, Analytical Thinking

PROJECTS

Heart Disease Prediction using Machine Learning

Python - Heart Disease Forecasting with Using Logistic Regression

May 2024

- Employed NumPy and Pandas for feature selection and preprocessing, enhancing logistic regression model and improving interpretability.
- Created comprehensive documentation and stakeholder-focused reports, demonstrating strong communication and analytical skills.
- Developed and deployed a machine learning model using Python, Scikit-learn, and Pandas, for early detection and preventive care.

Image Steganography using Java

Java, Java OOPs, Java Swings, DSA, Steganography

May 2024

- Developed a Java-based image steganography application utilizing Swing UI and advanced data structures and algorithms.
- Used LSB steganography techniques to securely encode and decode text messages within images, ensuring covert communication.

EXPERIENCE

Dr OP Chaudhary Hospital and Research Centre

Biomedical Services

Dec 2023 - Jan 2024

- Assisted in the preparation and examination of biological specimens, ensuring compliance with laboratory protocols and quality standards. Collaborated across teams and communicated findings, strengthening interpersonal and coordination skills in a structured environment.

ACHIEVEMENTS

- **GeeksforGeeks – Automation Testing**, Currently pursuing an online certification course focusing on Selenium, TestNG, and automation frameworks for real-world testing scenarios(ongoing).
- **Apna College DSA**, Completed Apna College DSA course, mastering essential programming concepts for efficient troubleshooting and algorithm design.
- **IBM - Introduction to Data Analytics**, Completed IBM's Introduction to Data Analytics course, acquiring practical skills for analyzing large datasets.
- **Drug Development**, ongoing course on Drug Development from UC San Diego, gaining insights into the pharmaceutical RD process and regulatory frameworks.

EXTRACURRICULAR

- **Core member - iOS club : Ahlaan**, Led the organization of Ahlaan event attended by 200+ participants as a core member of iOS Club, collaborated with diverse teams and managed cross-functional communication effectively.
- **Volunteered: Rabvit 3.0**, Volunteered at Rabvit 3.0, a bio-related debate event with 150+ participants, contributing to the organization and success of the event.

INTERESTS

- In my free time, I enjoy capturing moments through photography.
- I enjoy doodling, these creative interests also enhance my problem-solving and ideation skills.
