EDUCATION

- **Master of Computer Applications in Artificial Intelligences and Data Science** CGPA: 7.95
DY Patil International University, Akurdi, Pune 2024
- **Bachelor of Science in Computer Science** CGPA: 9.57
Pillai HOC College of Arts, Science and Commerce, Rasayani 2022

TECHNICAL SKILLS

- **Programming Languages:** Python, HTML, CSS, JavaScript
- **Frameworks & Libraries:** React.js, Node.js, Selenium, TensorFlow, Scikit-Learn
- **Databases:** MySQL, SQLite, MongoDB
- **Testing Tools & Methodologies:** Manual Testing, Automation Testing (Selenium, Cypress), JMeter, SDLC, Agile, Waterfall, Jira
- **Cloud & DevOps:** AWS, Docker, VMware, VirtualBox
- **Data & Visualization:** Power BI, Looker, Pandas, Numpy
- **Version Control & Collaboration:** Git, GitHub, MS Office, Discord
- **Soft Skills:** Team Collaboration, Communication, Problem-Solving, Leadership

INTERNSHIPS

- **QA Automation Intern** Jan 2025 – Present
Apptestify, Pune, Maharashtra
 - Built and maintained automated regression test suites using Cypress.
 - Performed thorough manual testing and reported bugs with 95% reproduction accuracy.
 - Collaborated closely with developers to resolve defects and improve test coverage.
 - Participated in test planning and documentation in Agile sprints.
- **Web Developer Intern** May 2024 – October 2024
EventDTL Pvt Limited, Pune, Maharashtra
 - Developed and maintained the ticket booking application frontend using React.
 - Executed Selenium-based UI automation testing
 - Conducted manual testing and API endpoint testing with JMeter.
 - Contributed to real-time integration testing and improved mobile responsiveness by 25%.
- **Business Analyst Intern** March 2024 – April 2024
Clavis International, Remote
 - Audited client B2B websites and identified improvement areas
 - Analyzed over 20 client websites, identifying key areas for improvement.
 - Assisted in enhancing online presence and performance for client businesses.
- **Data Analyst Intern** January 2024 – March 2024
Ozibook Tech Solutions Private Limited, Remote
 - Improved engagement insights by 30% through LinkedIn data scraping and increased client outreach by 15%.
 - Applied data insights to improve user engagement by 30%.

SELECTED PROJECTS

•AI-Based Web Security Firewall (AIWEBSEC)

An AI-powered web security firewall for real-time threat detection and prevention.

- Developed an AI-driven web security firewall for dynamic clustering and real-time threat detection.
- Implemented mechanisms to prevent unauthorized access and malicious attacks.
- Utilized SQL for data management and optimization.
- Played a key role in coding and documentation for future updates and scalability.
- **Technology Used:** Python, SQL, Machine Learning.
- **GitHub:** Project Link

•Facial Recognition Attendance System

A real-time facial recognition system for seamless attendance tracking.

- Integrated facial recognition with MySQL for attendance tracking.
- Designed a Tkinter-based interface for better user experience.
- Enhanced efficiency with OpenCV for real-time image processing.
- **Technology Used:** Python, Tkinter, MySQL, OpenCV.
- **GitHub:** Project Link

Certificates

- Data Analytics and Visualization Virtual Experience**- Key Skills: Data Analysis, SQL, Python, Power BI
- ChatGPT Mastery**- Key Skills: Prompt Engineering, ChatGPT
- AWS APAC Solutions Architecture Virtual Experience**
- LinkedIn: Hands-On Data Science**- Key Skills: Data Science, Python
