

A hardworking and dedicated team player with experience in problem-solving and web development. Works effectively in a fast-paced, agile environment, and is passionate about developing software web applications.

EDUCATION

• Master of Computer and Application – SRM University	01/2023 - 01/2025
• Bachelor of Computer Application - Delhi Global Institute of Technology	06/2018 - 06/2021
• Senior Secondary Education – Gagan Bharti School	04/2017 -04/2018
• Secondary Education – Gagan Bharti School	04/2015- 04/2016

SKILLS

- HTML, CSS, JavaScript, React, Redux, GraphQL, SQL, NodeJs
- API Integration, Testing, and Debugging
- Axios, Ant Design, User Authentication, Git Version Control
- Data Structure and Algorithm
- Communication and Time Management

WORK EXPERIENCE

The Oceann

December 2023- Present

- Proficient in Redux state management and RESTful API integration for enhanced user experience.
- Expert in debugging and third-party library integration.
- Developed reusable UI components for streamlined development.
- The key contributor to Ocean Ship and Ocean Mail projects, optimizing UI and performance for improved user experience.

PROJECTS

- Voyage Manager

[Project Link](#)

A voyage management project involves planning, organizing, and overseeing maritime journeys. It includes route planning, scheduling, resource allocation, compliance with maritime regulations, and ensuring the safety and efficiency of the voyage. The project typically employs software solutions to track and manage ships, cargo, and crew, optimizing operations and minimizing costs. Key aspects also involve managing communications, weather monitoring, and responding to any emergencies that may arise during the voyage.

CERTIFICATIONS

- Full stack web development course from Newton School
- HTML fundamental course Internship from Solo Learn.
