Address: Gachibowli, Hyderabad, Telangana, 500032.

Email Address: koushikreddy092@gmail.com

Mobile: +91-7989665101

D.O.B: 09/02/1998

Career Objective:

To leverage my skills in business analysis, stakeholder collaboration, and data interpretation in a challenging environment that promotes innovation and learning—allowing me to deliver business value while growing both professionally and personally.

Professional Summary:

- Business Analyst with 3 years of experience driving process improvements, operational efficiency, and business transformation through data-driven insights.
- Strong interpersonal and communication skills, comfortable leading meetings, facilitating workshops, and managing stakeholder expectations across departments.
- Adept at agile methodologies, participating in sprint planning, backlog grooming, and maintaining documentation to support iterative development.
- Proficient in gathering and analyzing business requirements, translating them into functional specifications, and ensuring alignment with stakeholder expectations.
- Demonstrated ability to work with cross-functional teams, acting as a key liaison between business stakeholders and technical teams to ensure successful project delivery.
- Documented and reviewed requirements, functional and design specifications, test strategies, and test cases with expertise, enhancing project accuracy.
- Skilled in Agile Scrum, Waterfall methodologies, and software development life cycle.
- Skilled in leveraging tools like SQL, Excel, JIRA platforms to extract, analyze, and visualize data that supports strategic decision-making.
- Adept at translating complex business needs into actionable technical specifications, ensuring alignment between stakeholder and development teams.
- Experienced in strategic analysis tools including SWOT and KPI frameworks to assess business process health and drive continuous improvement initiatives.

Technical Skills:

Core Skills: Requirements Gathering, BRD, FRD, User Stories, UAT, RCA, Gap Analysis, KPIs / Metrics, Change Management

Tools & Platforms: JIRA, SQL, Excel, Power BI, MS Visio, Balsamiq, Axure

Methodologies: Agile, Waterfall

Collaboration: Stakeholder Management, Sprint Planning & Review, Cross-Functional Teams

Wireframes & Diagrams: UML, Process Flows, UI Mockups

Education

- B. Tech - Mechanical Engineering from the Holy Mary Institution of Technology and Science (Affiliated JNTUH-Hyderabad)

Work Experience

- **Cognizant - Hyderabad, Telangana**
 - June 2021 to September 2022: LTO operator
- **Cognizant - Hyderabad, Telangana**
 - September 2022 – Present: Business Analyst

Project Experience

Cognizant - Hyderabad, Telangana from Sep'22 to Present

Project: GEO-DATA Operations

Role: Business Analyst

Project Summary: Working on a large-scale geo-data operations project supporting Google Maps' IOA Tech Maps, aimed at enhancing the accuracy and integrity of millions of business listings globally. The project involves managing multiple interconnected workflows designed to ensure that each business identity is correctly represented

Responsibilities:

- Collaborated closely with senior business analysts, clients, and operations teams to implement process improvements and quality enhancements in a complex, multi-workflow project.
- Worked on both Agile and Waterfall methodologies, adapting to shifting priorities and ensuring timely delivery of project milestones across iterative and structured environments
- Conducted requirement-gathering sessions with business stakeholders to define functional and non-functional requirements.
- Analyzed operational metrics to identify data quality gaps and collaborated with engineering teams to implement fixes, resulting in improved SLA compliance by 10%.

- Used JIRA to manage requirements, track tasks, and facilitate transparent communication among cross-functional teams
- Conducted in-depth data analysis to evaluate product performance and identify opportunities for business improvement, leading to measurable gains in quality and efficiency.
- Designed and maintained performance dashboards that provided real-time insights to stakeholders, enabling data-driven decisions and improving process visibility
- Conducted Sprint Review meetings to gather stakeholder feedback and continuously refine product features and workflows.
- Participated in daily Scrum meetings to provide project status updates, discuss blockers, and align priorities with cross-functional teams.
- Led Joint Application Development (JAD) sessions to gather and validate business rules, functional requirements, and UI (User Interface) specifications.
- Played a key role in implementing workflow changes that resulted in measurable improvements in data accuracy, product quality, and delivery timelines.
- Used JIRA to manage requirements, track tasks, and facilitate transparent communication among cross-functional teams.

Cognizant - Hyderabad, Telangana from June 21 to September 22

Project: LTO

Role: Process Executive

Responsibilities:

- Worked as LTO operator responsible for driving significant changes in the project enhancing efficiency and quality
- Played a key role in enhancing project efficiency and data quality by eliminating duplicate listings on Google Maps, reducing user confusion and improving map accuracy.
- Conducted Root Cause Analysis (RCA) on escalated data and mapping issues, identifying recurring problems and implementing process-level improvements for long-term quality gains.
- Extracted operational and performance data from source systems and transformed them into insightful dashboards and reports, enabling real-time performance monitoring and decision-making.
- Aligned team activities using insights from performance reports, increasing productivity and ensuring delivery of production and quality targets consistently
- Provided ongoing mentorship to new and existing team members, sharing best practices and supporting continuous learning and high team morale.

- Demonstrated strong collaboration and communication skills, working closely with cross-functional teams to maintain quality standards and operational excellence.

ACHIEVEMENTS

- Received Outstanding Performer Award for consistently delivering high-quality outputs and driving impactful process improvements.
- Actively supported Agile ceremonies (daily stand-ups, backlog grooming, sprint planning), resulting in on-time delivery of 95% of sprint goals over 6+ months.
- Successfully implemented process enhancements which resulted in improving the operational efficiency.
