PROFESSIONAL SUMMARY

I have worked as a Systems Application Analyst with a strong background in product implementation due to practical experience gained through part time employment during my college. My transition from part-time to a full-time role within the same company attests to my commitment and contribution to the team. Delivered smooth initiation during go-live and long-term satisfaction through personalized support. Adept at user training, workflow improvement, and ensuring data accuracy. Currently pursuing a Master's in Financial Data Analytics to further integrate technical expertise with data-driven insights for business impact.

EXPERIENCE

Microsoft Product Advisor (Part-Time) | 01/25 – Present

McCurach | Brighton

- Advised customers on Microsoft laptops and Microsoft 365 solutions (including Teams, OneDrive, and Copilot), matching product capabilities to user needs for both personal and professional use.
- Delivered tailored tech support and demonstrations, helping customers understand M365 subscription options and how tools like Copilot and OneDrive enhance productivity.
- Achieved over £6,500 in sales in a single day, consistently exceeding targets through expert product knowledge and personalised recommendations.
- Maintained a 40–50% conversion rate by building rapport, communicating technical benefits clearly, and aligning solutions with customer goals.

Systems Application Analyst | 03/23 – 06/24

Yashuss Unlimited Business Solutions Pvt Ltd | Mumbai

- Assisted in the design, implementation, and maintenance of 5+ software applications.
- Analyzed user requirements, resulting in a 10% improvement in workflows and efficiency.
- Completed the migration of employee data for 1600+ users in HRMS software with 100% data accuracy.
- Collaborated with over 20 end-users to understand their needs, achieving 90%+ satisfaction with application features and support.
