Project

Backend Project - Loan Eligibility App

🔗 [GitHub](#) [🔗](#)

- Predicts loan eligibility using ML models (Logistic Regression, Decision Tree) with user input via a Streamlit web form.
- Built using Python, Pandas, Scikit-learn, and Joblib for data processing and model saving.
- Integrated n8n workflow to automate email alerts, data tracking, backend tasks and also uses open ai integration.
- Visualizes data insights using Matplotlib and Seaborn for better model understanding.
- Production-ready system that automates loan screening, reduces manual effort, and speeds up decision-making.
