OBJECTIVE

Motivated Electronics and Telecommunication Engineer seeking a Trainee Engineer position. Bringing a solid foundation in electronics and telecommunication and analytical mindset, coupled with hands-on experience in project development.

EDUCATION

B.E. Electronics and Telecommunication Engineering	2020 - 2024
Gharda Institute of Technology, Lavel	CGPA: 8.34
Senior Secondary (PCMB)	2020
D. B. J. College, Chiplun	PERCENTAGE: 68.31 %
Secondary	2018
N.E.S. Kurval Javali	PERCENTAGE: 91.80 %

EXPERIENCE

Catalogue Management Apprentice	Dec 2024 - Present
Amber – Remote	
Catalog Management: Product listing updates, auditing, and content maintenance Data Entry & Accuracy: High-volume, error-free data handling and validation Software Proficiency: MS Excel, Google Spreadsheets, Slack, Suptask, Freshdesk Online Research: Accommodation availability checks, partner website monitoring Attention to Detail: Catalog quality assurance, error identification Collaboration & Communication: Coordinated with cross-functional teams via Slack and Suptask Customer Support Tools: Experience using Freshdesk for query management	

PROJECTS

Design of Tortoise Monitoring and Analysis System for Velas Beach
- Engineered a comprehensive system utilizing Arduino Uno to monitor and analyse environmental conditions for tortoises at Velas Beach. - Integrated sensors to measure temperature and humidity in real-time, providing critical data for tortoise conservation efforts. - Implemented GSM technology for seamless transfer of sensor readings to mobile devices, enabling remote monitoring. - Conducted field testing and calibration to ensure the accuracy and reliability of sensor data.
Password Based Door Lock Open System Using LPC2148 and Bluetooth Module
- Developed a secure door lock using LPC2148 microcontroller and Bluetooth technology. - Implemented password authentication for enhanced security. - Enabled wireless control and monitoring through a Bluetooth module. - Programmed and optimized the system for efficient functionality. - Conducted rigorous testing to ensure reliability and security.

SKILLS

Programming Languages: Basic Python Programming, Basics of SQL Hardware: Microcontrollers, Arduino, LPC2148 Telecommunication Protocols: GSM, GPRS, LTE Software Tools: Arduino IDE, Proteus, Microsoft Excel Networking: Basics of TCP/IP and OSI Model
--

ACHIEVEMENTS

- School Topper in Secondary Examination in 2018 - Achieve Gold Medal in various Games. - Gold Medal in Speech Competition in School
--

HOBBIES

Playing Cricket and Volleyball, Cooking.
--
