Summary

Motivated and detail-oriented Computer Science graduate with a solid foundation in Python, SQL, HTML, and CSS. Skilled in applying technical expertise and analytical problem-solving abilities to support organizational objectives. Seeking an entry-level software or web development position to contribute innovative solutions, collaborate effectively within teams, and pursue continuous professional growth in a dynamic environment.

Skills

- Programming Languages: Python, C, SQL
- Web: HTML, CSS
- Database: MySQL
- Frameworks/Libraries: TensorFlow, Keras
- Tools: VS Code, PyCharm

Education

Sant Gadge Baba Amravati University

Bachelor of Engineering, Computer Science & Engineering, 8.93 CGPA

(2018 – 2022)

Nagar Parishad Junior College

Class 12th – Higher Secondary School

(2017 – 2018)

Nagar Parishad Vidyalaya

Class 10th - Secondary School

(2015 – 2016)

Certifications

- Complete SQL Course -Coursera, Issued 2025-05
- Complete Python Programming-Udemy, Issued 2024-12

- Python For Data Science-NPTEL, Issued 2022-03
- Introduction to Computer Training-IIT BOMBAY, Issued 2022-01

Personality Traits

- Fast learner
- Team-oriented
- Responsible and dependable
- Detail-oriented
- Adaptable

Academic Project

1. Project: Fine-Grained Image Classification

Technologies Used: Python, TensorFlow and Keras Machine Learning, Computer Vision

- Developed a machine learning model to classify images into sub-categories within the same general category (e.g., different bird species, dog breeds, or car models).
- Applied computer vision techniques and trained the model on a fine-grained dataset to capture subtle differences between similar-looking classes.
- Focused on reducing intra-class variation and improving model accuracy using techniques like data augmentation and deep neural networks.
- Gained hands-on experience in image preprocessing, feature extraction, and model evaluation using classification metrics like accuracy and precision.

2. Project: Student Living Care

Technologies Used: HTML, CSS

- Designed and developed a web-based platform to help students find suitable meal services and rental rooms in the city, making it easier for them to settle in new areas.
- Built a user-friendly interface with individual pages for mess listings and room rentals, including details like location, rent, contact, and amenities.
- Project was selected among the Top 50 innovations at College of Engineering Pune, recognizing its real-world relevance and student-centered approach.
- Strengthened skills in front-end development and applying technology to solve local, practical problems.

ACHIEVEMENTS

- Selected among the Top 50 projects at College of Engineering Pune for the "Student Living Care" innovation.
- Awarded Merit Certificate by Sant Gadge Baba Amravati University for securing the top position in the first year of engineering.
- Finalist in a National Level Hackathon hosted by S.B. Jain Institute of Technology, Management, and Research.
