Education

Bachelor of Technology (B.Tech.), Computer Science and Engineering

Vishwakarma Institute of Technology, Pune, Maharashtra

May 2024

CGPA: 8.23

Relevant Coursework

- Data Structures
- Database Management
- Computer Networks
- Engineering Mathematics
- Software Engineering
- Operating Systems
- Machine Learning

Experience

Altysys

March 2025 – July 2025

Data Engineer Intern

Pune, Maharashtra

- Worked on the Databricks Lakehouse Platform as a Databricks Certified Data Engineer Associate.
- Developed and optimized efficient Spark SQL queries for large-scale distributed data processing.
- Built and maintained Delta Live Tables, while exploring Unity Catalog features and access controls.
- Performed Extract, Transform, and Load processes and data transformations using PySpark to build data pipelines.

Projects

Collaborative Problem-Solving and Discussion Platform | *Python, Django, HTML/CSS*

April 2024

- Developed a website that provides a one-stop destination for Users preparing for coding competitions.
- Implemented the project using HTML, CSS for the front end, and the Django framework for back-end development.
- Users can add their questions, topics, and chats so that other users can solve them and address their queries.

Quiz Application Using Java | *Java, GUI*

July 2023

- Developed a GUI-based application to solve quizzes related to core Java, displaying the result upon submission.
- Built a GUI application using Swing and AWT, applying Object-Oriented Programming principles in Java.
- Designed to help users effectively assess their knowledge and improve practical skills in core Java concepts.

Dictionary Using Binary Search Tree | *Data Structures*

March 2023

- Developed a console-based application that is used to search the meaning of a word in the dictionary alphabetically.
- Implemented using the concept of Binary Search Tree (BST) and the C++ programming language.
- Word and meaning stored in the node of BST. We can add words to the dictionary if they are not present in dictionary.

Technical Skills

Languages : C++ | Java | Python | C | Structured Query Language | JavaScript | HTML | CSS

Tools & Technologies : ReactJS | Node.js | Django | Databricks | Pyspark | Web Development | VS Code | Git

Soft Skills : Problem solving | Adaptability | Teamwork | Communication | Analytical thinking | Leadership

Certifications

- Published a research paper as part of a project in YMER, a UGC-CARE-approved and peer-reviewed journal.
- Certified as a Databricks Data Engineer Associate, with skills in designing and implemented data pipelines using Spark, SQL, and Delta Lake on the Databricks Lakehouse platform.
- Completed UdeMy's Complete 2022 Web Development Bootcamp, covering full-stack development with real-world projects using modern web technologies.

Achievements

- Achieved a 3-star rating on the CodeChef programming platform and solved over 200 problems on LeetCode.
- Secured Rank 1124 out of 400,000 candidates appeared for Maharashtra State Entrance Exam (MH-CET) 2020.
- Achieved 7th std Scholarship of Maharashtra State Government through Scholarship exam with district Rank 10.

Leadership / Extracurricular

- Participated in Aatma Bhodha Social welfare Activity, In Which I taught two students in a rural area.
- Organized Swachh Bharat Abhiyan in Pune on the occasion of the 75th Independence Day celebration.
- Participated in different sports events in the College annual sports Program 'Vishwakarandak 2024'.
