Education

Chandigarh University Aug. 2021 – July 2024
Bachelor of Science in Computer Science Mohali, Punjab

Pakur Polytechnic Aug. 2017 – Nov 2020
Electrical Engineering Pakur, Jharkhand

Matriculation Aug. 2016 – July 2017
10th Bihar

Internship

Urban Company July 2025
Business Development Associate Bangalore

- Utilized **Microsoft Excel** for data analysis, financial modeling, lead tracking, and performance reporting .
- Monitored and reported business KPIs through **interactive dashboards** (e.g., Google Data Studio, Power BI, or CRM tools).
- Collaborated cross-functionally using **Slack** to streamline team communication and coordinate with sales, marketing, and operations.

Bytekloud March 2025 – April 2025
Full Stack Engineer – Intern Bangalore

- As a Full Stack Engineer Intern at Bytekloud, I work across both frontend and backend projects to deliver robust and scalable web applications. Leveraging technologies like React.js, Next.js, Node.js, Express, Python, FastAPI, and Docker, I actively contribute to application design, development, and deployment processes.
- My key impact includes optimizing backend APIs for faster response times, implementing dynamic user interfaces, and ensuring responsive design compatibility across devices.

Kalvium Sep 2024 – Nov 2024
Technical Mentor Intern Bangalore

- As a Technical Mentor Intern at Kalvium, I provided hands-on guidance in JavaScript and React to junior developers. My focus was on debugging, application optimization, and clarifying foundational programming concepts.
- I led weekly mentoring sessions, helped students resolve real-world project issues, and fostered critical thinking in software development .

Projects

LEARNING MANAGEMENT SYSTEM | *Python, Django, Html, CSS, Postgresql.* January 2021

- Developed a dynamic and responsive **Earning Management System** web application using **Django** as the backend framework. .
- Implemented a **role-based authentication system** for Admin and Student dashboards. .
- Built a comprehensive **Admin Panel** to manage courses, students, quizzes, results, and course enrollment status.
- Designed a **Student Dashboard** where users can **enroll in courses**, **attempt quizzes**, and **download results** in PDF format.

Customer Relationship Management (CRM) System | *Java* November 2023

- Address and this application also can do curd operations like add details, delete customer details, update customer details, delete the details of the customer..
- It should increase productivity by utilizing the working hours more and more, with minimum manpower.
