

MUSTAFA A MULLA

Location:Bangalore, Mobile:7259672935

Email: mustafa.mulla565@gmail.com

OBJECTIVE

To pursue a challenging career and be a part of progressive organization that gives a scope to enhance my knowledge and utilizing my skills towards the growth of the organization

ACADEMIC DETAILS

DEGREE	COLLEGE	UNIVERSTY	GRAD.YEAR	PERCENTAGE
BE(CSE)	The Oxford College of Engineering	VTU	2022	65%
12 th (Higher Secondary)	Sangameshwar Composite PU College	Karnataka PU Board	2018	70.5%
10 th (Matriculation)	SS Kadapatti International Public School	CBSE	2016	81.7%

TECHNICAL PROFILE

Languages	Java, Springboot, html, CSS
Operating System	Windows
Database	MySql
IDE	Visual Studio, Eclipse, IntelliJ

PROJECTS SUMMARY

BE FINAL YEAR PROJECT

Project: Night Patrolling Robot

Technologies: Machine Learning, Python

Description:

A security patrolling robot is one that uses night vision camera for securing any premises. Which focuses on updating technology framework to make stronger women safety. It is equipped with night vision camera and sound sensors. The system uses IR based path and predefined line to patrol the assigned area. Any sound detected; it starts moving towards the sound on its predefined path. It monitors each area to detect any intrusion using 360-degree rotating HD camera. It then scans the area using camera to detect any human face. If detected, it captures and starts transmitting the images of situation immediately on sound or human face detection. •

Here we use IOT Local Area Network [LAN] for receiving transmitted images and displaying them to user with alert sounds. To improve the accuracy of the classifier, we use multi model neural network method closely related to human visual system that automatically learns to describe the content of image. Our model consists of two sub models – an object detection and localization model which extract the information of object and their spatial relationship in images respectively.

Experience:

- Experience with React js and created a website to-do list which is just a list of things you have to-do and this to-do list can add new tasks and we can also delete the tasks by clicking on them.
- Created a responsive website for Gym using HTML, CSS and JavaScript.
- Created a world clock project using HTML, CSS, Javascript, and Bootstrap

Responsibilities:

- Working with our team to understanding the requirement.
- Working with project guide to design the system
- Developing the application

TRAINING AND CERTIFICATION:

- Trained on **Java full stack** development
- Completed Internship in Comp Soft Technologies on Machine Learning Project

STRENGTHS

- Productive self-starter with a strong work ethic and consistent in achieving goals.
- Will to learn and apply newfound knowledge and leverage its benefits for the betterment of the organization.
- Dedication for committed work
