

Nadeem Akthar

Data Analyst

Analytical and impact-driven Product Analyst Intern with hands-on experience at Bezu.AI, an AI companionship startup. Skilled in analyzing user behavior, retention, and growth using tools like Mixpanel, Amplitude, Power BI, and SQL. Adept at transforming product data into actionable insights, building dashboards, and collaborating with cross-functional teams to drive data-informed decisions in fast-paced startup environments.

WORK EXPERIENCE

Product Analyst Intern Bezu.AI

03/2025 - Present

Bengaluru, India

Achievements/Tasks

- Supported both product and data teams in driving **user growth and retention** for an AI companionship platform offering chat, audio, and video calls with custom AI characters.
- Conducted in-depth user behavior and funnel analysis using **Mixpanel** and **Amplitude**, helping identify key drop-off points and feature adoption patterns.
- Regularly tracked user journeys, churn, and cohort behaviour to support strategic product decisions.
- Built and maintained interactive **Power BI dashboards** to visualise product usage metrics and retention KPIs for leadership and cross-functional teams.
- Wrote optimised **SQL queries** to extract and segment user data for analytics and reporting.
- Collaborated closely with product managers and developers to recommend improvements based on data-driven insights.
- Contributed to launches and experiments that positively impacted retention and user engagement.

EDUCATION

Master of Computer applications(MCA) Jain University

09/2022 - 03/2025

Courses

- Artificial Intelligence

Bachelor of science(BSC) Sri Krishnadevaraya University

07/2019 - 08/2022

Courses

- Computer Science

SKILLS

Python

SQL

Excel

Pandas

Numpy

Data Visualization

Machine learning

Scikit-Learn

Exploratory Data Analysis (EDA)

Statistical Analysis

Model Evaluation

Data Preprocessing

Power BI

Tableau

MixPanel

Amplitude

PERSONAL PROJECTS

Data Analysis on construction worker's productivity

- Developed IoT-based Productivity Monitoring System:** Created a system to monitor construction worker productivity using IoT sensors for real-time data collection on parameters like GSR, pulse rate, body temperature, and more.
- Data Analysis and Machine Learning Integration:** Applied machine learning models to analyze sensor data and predict worker productivity, leveraging algorithms to identify patterns and insights for improving efficiency.
- Impact and Outcomes:** Improved monitoring and productivity assessment capabilities, providing actionable insights to enhance worker efficiency and project management.

ACHIEVEMENTS

Virtual Internship on Power BI

PwC

Virtual Internship on Data Visualization

Tata Communications

Virtual Internship on Data Science

British Airways
