Professional Summary

Engineering undergraduate with strong skills in programming, data analysis, and system design. Proficient in Python, SQL, C, and tools like Power BI, Tableau, and Excel. Hands-on experience through projects and internships in data science and data analysis. Quick learner with solid problem-solving and collaboration abilities, eager to contribute to a technical role in a fast-paced environment.

Technical Skills

Languages: Python, SQL, C, C++ (Basics)

Tools/Libraries: Power BI, Tableau, Excel, Pandas, NumPy, Matplotlib

Concepts: Data Cleaning, EDA, Data Visualization, OOP, Basic Networking

Soft Skills: Critical Thinking, Problem-Solving, Communication, Team Collaboration

Education

B.E. in Electronics and Communication Engineering

Aug 2021 - May 2025

R M K College of Engineering and Technology

CGPA: 7.55 / 10.0

Internship Experience

Data Analyst — Datamites [Bengaluru, Karnataka]

Apr–June 2025

- Analyzed large-scale datasets using Python (Pandas, NumPy) to uncover actionable insights. Created dynamic Power BI dashboards and Excel reports to track business KPIs and trends.
- Extracted and joined data from relational databases using advanced SQL queries. Performed exploratory data analysis (EDA) and data cleaning to prepare data for modeling.
- Built and evaluated predictive models using regression and classification techniques. Collaborated with mentors to interpret analytical findings and support data-driven decision-making.
- Delivered a capstone project on Customer Segmentation.

Data Science Intern — Cyrostack IT Solutions (ISO 9001:2015)

Mar–Apr 2025

- Conducted data pre-processing, exploratory data analysis (EDA), and predictive modeling on real world datasets to support business decisions.
- Developed interactive dashboards using Power BI/Tableau to visualize key metrics and uncover actionable insights.
- Collaborated on ISO 9001:2015-compliant IT projects, ensuring data integrity and adherence to quality standards.

Projects

Credit-score model for DeFi wallets (GitHub)

- Built a data-driven credit scoring model using historical Aave V2 transaction data to evaluate DeFi wallet reliability on a 0–1000 scale.
- Applied data cleaning, feature engineering, and classification techniques in Python to identify patterns in on-chain user behavior.
- Developed end-to-end project with exploratory data analysis, model evaluation, and insightful reporting using pandas, scikit-learn, and Matplotlib.

E-commerce Sales Data Analysis

- Conducted in-depth analysis of customer behavior and sales trends using Python (Pandas, Matplotlib) and Power BI.
- Cleaned and transformed raw datasets by handling missing values and outliers to ensure data consistency and accuracy.
- Created dynamic dashboards and reports to highlight best-selling products, seasonal sales patterns.

Certifications

- Data Analysis with Python — freeCodeCamp
- Python programming — Internshala
- Data Science & Analytics — HP LIFE / HP Foundation
- Learning ChatGPT for Business Analysis — LinkedIn Learning
- 5G Networks — SRM University

Achievements

- Top 8072 rank on Skillrack coding platform
- District-Level Volleyball Player
- Won first prize in school science exhibition for an innovative project
