PROJECT

Sales Analysis Dashboard – Amazon Products – [View project](#)

Tool used: Power BI

- Developed a Power BI dashboard analysing **\$2.18M** Year-to-Date (YTD) sales, **\$811.09K** Quarter-to-Date (QTD) sales, and **27.75K** units sold across multiple Amazon product categories
- Visualized sales trends by month and week, revealing a **2x sales** surge in November–December compared to mid-year performance
- Identified top-performing categories, with Men Shoes contributing **43.18%** and Cameras **22.62%** of total YTD sales, aiding in revenue-focused category prioritization
- Incorporated DAX-based KPIs to calculate dynamic metrics such as % Growth, QTD/YTD sales, and category-wise breakdown, enhancing analytical efficiency
- Enabled product-level and review-based comparisons, using visual rankings across **19.42M** customer reviews and top 5 products by both sales and review volume
