PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on experience in SQL, Python, and data visualization. Utilizing strong analytical skills in data cleaning, modeling, and forecasting to drive business insights and optimize decision-making. Proficient in Power BI, Excel, and Machine Learning, with a background in e-commerce, inventory planning, and business intelligence. Skilled in developing automated dashboards and predictive models to enhance efficiency. Passionate about leveraging data to solve real-world problems and support strategic business goals.

WORK HISTORY

Data Analyst | Flipkart India Private Limited - Bengaluru

09/2024 - Current

- **Data Analysis & Forecasting:**
Performed in-depth analysis of nationwide inventory datasets to forecast demand trends, optimize stock replenishment cycles, and successfully reduce shortfall incidents by **15%** across **12+ product categories**, improving product availability and customer satisfaction through Supply Chain management.
- **Data Reporting & Visualization:**
Designed and automated real-time dashboards and comprehensive inventory reports using **Excel, Power BI, and SQL**, enabling faster data-driven decisions that cut average delivery lead time by **20%** and supported inventory optimization strategies and Supply chain at a **pan-India level**.
- **Data Management & Predictive Analytics:**
Utilized **SQL** and **Python** to extract, cleanse, and analyze large-scale inventory and logistics data. Implemented the **Milk Run Concept** to optimize supplier pickups, reducing transportation costs and improving **inventory turnover by 12%**. Collaborated with procurement and warehouse teams to align stock levels, cutting **excess inventory by 10%** and minimizing holding costs across multi-location hubs.
- **Trend & Sales Performance Analysis:**
Defined and monitored critical **KPIs** — including inventory turnover ratio, shortfall rate, reorder point accuracy, and replenishment lead time — using **Excel and Power BI**. Leveraged advanced analytics to uncover patterns, enabling a **12% uplift in sales** through proactive stock management and improved forecasting models.

Intern - AI & Data Science | Ambuja Cement Foundation (AU Ignite) - Jaipur

01/2024 - 04/2024

- Cleaned, processed, and visualized data using Python, Power BI, and Excel to improve data quality and insights.
- Collaborated with cross-functional teams on Data Science projects, contributing to impactful solutions and enhancing analytical capabilities.
- Automated interactive dashboards by 25% to streamline reporting and provided actionable insights for data-driven decision-making.
- Designed an E-Commerce Sales Dashboard using Advanced Excel and Power BI, optimizing sales analysis and business performance tracking.

Intern - Data Science | Celebal Technologies - Jaipur

05/2023 - 07/2023

- Contributed to Data Science and AI projects, developing a Car Price Prediction Model and a Toxic Comment Classifier using Machine Learning and NLP techniques.
- Collaborated and lead the team of 5 members to develop product features, analyze data, and generate insights for decision-making.
- Assisted in product documentation and project updates, improving clarity and communication of development milestones.
- Gained hands-on experience with Python and its libraries, enhancing technical proficiency during the internship.

EDUCATION

Arya College Of Engineering & I.T. - Jaipur, India

08/2020 - 07/2024

Bachelor of Technology: Artificial Intelligence and Data Science

SKILLS

- | | |
|--------------------|--------------------------------|
| • Python | • R |
| • Tableau | • SQL |
| • Power BI | • Advance Excel |
| • Machine Learning | • Data Visualization |
| • Data Cleaning | • Data Modeling |
| • Leadership | • Supply Chain Management |
| • Data Reporting | • Demand forecasting |
| • Demand planning | • Inventory Planning & Control |

PROJECTS

Car Price Prediction Model

Developed a predictive machine learning model to forecast car prices based on user inputs. Integrated market research and analysis to enhance model accuracy. Used Python and scikit-learn.

E-Commerce & Sales Dashboard

Utilizing the power of Power BI I meticulously cleaned and visualized sales data, insight generation by analysis. Utilize the dashboard's real-time metrics to identify and capitalize on opportunities for improvement, enhancing overall customer experience and driving increased sales.

Plan Vs Actual Automated Report

Developed an automated Plan vs Actual (PVA) report using R, Python, SQL, and Power BI, refreshing at 3-hour intervals to provide up-to-date metrics including Last-day-to-current-day, week-to-week, and month-to-date (MTD) comparisons.

Automated reporting pipelines to track key KPIs such as Brand Pareto, Cluster-level performance, Segment trends, and Slow Movement Non-Movement (SMNM) analysis, increasing reporting efficiency by 40% and ensuring timely stakeholder visibility.
