Summary

Business Analyst with exceptional analytical skills and a proven ability to leverage tools like Power BI, MySQL, and Advanced Excel to derive actionable insights. Adept at problem-solving, data storytelling, and streamlining processes to support data-driven decisions that enhance business growth and operational excellence.

TECHNICAL SKILLS

Data Visualization Tools: Power BI, Power Query, Power BI Desktop, Power BI Service, Advanced Excel (XLOOKUP, VLOOKUP, HLOOKUP, Pivot Table, SUMIF, COUNTIF), MS Visio

Business Analysis & Documentation: BRD, FRD, RFP, PDD

Programming & Data Management: Python, MySQL, NumPy, Pandas, Matplotlib, Seaborn

Project Management & Collaboration: Agile Methodology, JIRA

Core Skills: Stakeholder Management, Communication, Storytelling, Presentation, Critical Thinking, Problem Solving

WORK EXPERIENCE

FEAT Systems | Business Analyst

Digital Banking Dashboard

- Developed a Digital Banking Dashboard to track and analyze user activities across key banking channels like CASA, Mobile Banking, Internet Banking, Debit Card, and QR transactions.
- Enabled bank stakeholders to monitor performance metrics like UPI volume, IR activity, and digital channel adoption at the branch level.

Verification of Backup Activity for VMs

- Collaborated with stakeholders from Bank of Maharashtra to gather and document requirements for automating VM backup verification.
- Defined key metrics (e.g., missed, completed, pending backups) and supported the development team in visualizing trends and compliance reports.

PROJECTS

Financial KPI Analysis | Power BI, Power Query | [Link](#)

- Designed and developed an interactive Power BI dashboard to monitor key financial KPIs (revenue, expenses, profit, ROI), improving reporting efficiency by 80%.
- Dynamically calculated KPIs like customer satisfaction, call metrics, and agent performance using ETL, data modeling, and DAX.
- Delivered actionable insights through clean, intuitive visuals, boosting stakeholder engagement and decision-making effectiveness by 75%.

E-Commerce Case Study | MySQL | [Link](#)

- Designed and implemented a scalable relational database schema to streamline e-commerce operations.
- Executed MySQL queries to extract insights, enhancing reporting and data-driven decision-making.
- Improved order tracking and customer profiling, driving operational efficiency and business growth.
