

Nayan Jain

+91 7987513001 — officialnj2003@gmail.com — linkedin.com/in/nayan-jain1 — github.com/Naja24

Summary — Data analyst with strong foundations in statistics, SQL, Python, and data visualization. Experienced in building interactive dashboards, performing data wrangling, and delivering actionable insights using real-world datasets. Skilled at working across the data pipeline—from extraction and transformation to presentation—with tools commonly used in top analytics teams.

Technical Skills

Languages	Python, SQL , PySpark
Tools & Libraries	Numpy , Pandas , Matplotlib Scikit-learn, TensorFlow
Analytics & BI	Power BI , MS Excel, Google Analytics , Tableau
Databases	MySQL , PostgreSQL , SQL server , MongoDB
BigData & Cloud	Google BigQuery , Azure Databricks
Concepts	Exploratory Data Analysis , Data Cleaning , Feature Engineering , Data Warehousing

Education

The LNM Institute of Information Technology, Jaipur
Bachelor of Technology (B.Tech)

Oct 2022 - June 2026
Computer Science and Engineering

Campion School, Bhopal
12th Grade: 94.8%

June 2021 - May 2022
CBSE

- Ranked in the top 3% of the school in board exams.
- JEE Mains - 97.14%

Work and Experience

Data Analytics Intern (LNMIIT) [Internship Certificate]

May 2024 – July 2024

Skills: Python, OpenCV, Time Series Analysis, Video Processing

- **Constructed video pipeline** for long jump analytics; improved segmentation accuracy from 72% to 90%.
- **Automated clip detection** to cut manual annotation workload by 30%, improving efficiency in video analysis.
- **Boosted analysis speed** by 15% through time series feature extraction.

Projects

E-Commerce Sales Dashboard [GitHub]

Apr 2025 – Apr 2025

Skills: Python(Pandas), Power BI, SQL Server, Excel

- **Structured Power BI dashboard** with 12 visuals analyzing sales, delay, and revenue across 20+ states.
- **Crafted 5 DAX KPIs** including AOV and delivery delay to support business decision-making.
- **Segmented 100K+ customers** by order count to visualize retention trends using calculated columns.

Bizlligence: A Modular, Scalable Automated ML Framework [GitHub]

Feb 2025 – Apr 2025

Skills: Python, Scikit-learn, TensorFlow, AutoML, Feature Engineering, ETL, Pipeline Design

- **Devised AutoML system** with reusable components for data prep, training, and evaluation.
- **Integrated feature engineering and preprocessing** templates that improved model accuracy by 25%.
- **Streamlined modular design** to reduce new ML pipeline setup time by 40%.

Mentor Recommendation system for CLAT [Live Demo]

Jan 2025 – Feb 2025

Skills: Python, Scikit-learn, Streamlit, PostgreSQL, Clustering, Similarity Matching

- **Instrumented matching logic** using rule-based filters and vector similarity for pairing students and mentors.
- **Employed clustering** to improve recommendation alignment as per student by 35%.
- **Processed 200+ student profiles** with latency under 500 ms for personalized mentor recommendations.

Achievements

- **5-Star HackerRank SQL Programmer** — Top 5% in SQL challenges
- **Fest Outreach Lead** — onboarded 10+ colleges, boosted visibility
- **State-level Chess Finalist** — Ranked Top 20% among 800+ players
