EDUCATION

Jaypee Institute Of Information Technology

B.Tech Information Technology - 7.5

2021 – 2025

Noida, Uttar Pradesh

TECHNICAL SKILLS

Languages: C, C++, Python

Technologies & Frameworks: Python libraries: Pandas, NumPy, Matplotlib, Networkx, Scikit-learn, OpenCV

Database: RDBMS (SQL), NoSQL (MongoDB)

Cloud & Devops: AWS (S3, EC2, IAM, RDS, DynamoDB), Docker, Kubernetes

Developer Tools: VS Code, Jupyter Notebook, Github, Adobe Photoshop, Gimp, Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Postman

PROJECTS

Guard Her Health 🧠

- **ML-Powered Breast Cancer Predictor & Classifier Web App.**
 - Engineered and implemented bespoke **Logistic Regression, Random Forest** models for breast cancer prediction, achieving accuracy of **98%**.
 - Developed a user friendly and simplified interface using HTML, CSS, Flask.

Illusion-Echo Interception Sentinel 🧠

- **A Deepfake Audio-Video Detection system leveraging Computer Vision and Audio Feature Analysis**
 - Developed a deepfake detection system using **ResNeXt (CNN)** for spatial feature extraction and **LSTM (RNN)** for temporal sequential video analysis, enabling high-accuracy classification of real vs. fake videos.
 - Implemented the Echo module for audio deepfake detection by extracting acoustic features (e.g., MFCCs) from input audio and comparing them against a reference dataset to identify real vs. fake audio.

Novel Explorer 🧠

- **Personalized Novel Recommendation Engine**
 - Conducted **exploratory data analysis (EDA)** to identify trends in authors, publishers, and genres; created visualizations to support data-driven insights.
 - Developed and optimized a **KNN**-based book recommendation system, utilizing feature-engineered data for accurate, personalized recommendations.

WORK EXPERIENCE

Ybi Foundation—Data Science and AIML Intern

06/2024 - 08/2024

-Developed and evaluated predictive models using real-world datasets, applying techniques in regression, classification, and model optimization.

-Performed comprehensive exploratory data analysis and completed weekly hands-on tasks across various AI/ML concepts including feature engineering and data visualization.
