## Quick Guide

---

- Recent IT graduate with strong analytical and problem-solving skills, proficient in data analysis, data modeling, SQL, and Power BI. Hands-on experience in analyzing business data, identifying trends, and supporting data-driven decision-making during internships. Eager to apply technical and business knowledge in an entry-level Data Analyst role to support strategic goals.

## Education

---

**BTech Walchand Institute of Technology, Solapur**, Information Technology 2021 – 2025

- CGPA: 8.62/10.0 ([🔗](#))
- **Coursework:** Database Management, Programming, Data Science, Predictive Analysis, Generative AI, Artificial Intelligence, Machine Learning

## Key Expertise

---

**Python, SQL, Data Analysis, Business analysis and management, Power BI, MS Excel**

## Experience

---

**Salesforce Smartbridge**, Software Developer Intern June 2024 – Aug 2024

- Salesforce fundamentals, Organizational setup, Relationship and Process automation
- Apex Testing and Debugging, Lightning Web Components and API

**Evergreen Micronutrients**, Business Analyst Intern Jan 2025 - June 2025

- - Conducted business analysis using Excel and Power BI to extract insights from sales and operations data. - Created dashboards for management to monitor key KPIs such as revenue trends, product performance, and refund rates. - Identified inefficiencies in the order process and proposed process improvements, increasing fulfillment speed. - Collaborated with operations and marketing teams to translate data into actionable strategies.

## Projects

---

### Credit card financial dashboard using Power BI

- Developed an interactive dashboard using transaction and customer data from SQL database, to provide real-time insights. Streamlined data processing and analysis to monitor key performance metrics and trends. Shared actionable insights with stakeholders based on dashboard findings to support decision-making processes.
- Tools Used: Power BI, MySQL, Ms Excel.

### Data Analysis Project on Blinkit Dataset

- Performed a complete data pipeline—from raw data ingestion to final reporting—using Blinkit's e-commerce dataset. Cleaned and explored data using Python (Pandas, NumPy), and wrote SQL queries to extract insights and compute key business KPIs.

Created an interactive Power BI dashboard with slicers, charts, and drill-downs to visualize user behavior, product demand, and sales trends.

- Tools Used: Python, SQL, PowerBI, Excel

### **Customer Churn Analysis Project**

- Analyzed customer churn patterns using a telecom dataset to identify reasons for customer drop-off and retention gaps.

Cleaned and preprocessed large datasets using Python (Pandas, Seaborn) and performed exploratory data analysis to uncover behavior trends.

Wrote advanced SQL queries to segment customers based on usage patterns, complaints, and support ticket history.

Built an Excel dashboard with pivot tables and what-if analysis to simulate churn rate reduction strategies.

Created a Power BI dashboard with interactive filters showing high-risk customer profiles, churn probabilities, and retention KPIs.

- Tools Used: Python,SQL,MS Excel,Power BI

## **Technologies**

---

**Languages:** C,Python,SQL,HTML,CSS

**Technologies:** POWER BI,MS Excel,PostgreSQL,MYSQL

## **Certifications**

---

**Data Analysis** by Microsoft and LinkedIn

**SQL using AI** by AI for Techies

**Cricket Analytics** by Mad About Sports Associated with Rajasthan Royals

**Power BI** by Skill nation

**Business analysis and management** by LinkedIn
