

Professional Summary

Financial Data Analyst with a strong foundation in **business analytics, machine learning and financial reporting**. Completed **MBA in Data Science**, delivering insights. Proficient in **Python, SQL, Power BI and Excel**. Known for transforming complex datasets into clear insights that support executive decision-making and operational efficiency. **1.5+ years** of experience in **global audits, IFRS-based reporting and client advisory** for MNCs across India, UAE and Europe.

Skills and Tech Stack:

- **Tools:** Excel (Advanced), Power BI, SQL, Python, Looker Studio
 - **Techniques:** Data Cleaning, Exploratory Data Analysis, Predictive Modelling, Feature Engineering
 - **Machine Learning and Statistics:** Regression, Classification, Clustering, Hypothesis Testing
 - **Reporting:** DAX, Power Query, Power Pivot, Dashboard Creation
-

Projects:

- 1) **Power BI and Excel: Tata Data Visualization - Empowering Business with Effective Insights Job Simulation** [\[GitHub\]](#)
 - Executed a data analytics simulation by **Tata Group**, developing **4 interactive visualizations** to represent key business metrics.
 - Designed **5+ data-driven questions** for a mock meeting with senior leadership to uncover bottlenecks and align with business goals.
- 2) **Power BI: Business Insights 360** [\[GitHub\]](#) [\[Power BI Report\]](#)
 - Built a **real-time Power BI dashboard**, integrating various domains to **enhance decision-making speed by 60%**.
 - Implemented **30+ visuals and 50+ DAX formulas** to optimize **revenue trend tracking** and **reduce report generation time by 40%**.
- 3) **Python and SQL: Data Science Capstone Projects** [\[GitHub\]](#)
 - Surpassed **85–95%** model performance across Churn, Pricing & Fraud domains using advanced ML algorithms.
 - Engineered models using XGBoost, Random Forest & Linear Regression on datasets with **7K–500K+** entries.
- 4) **Python and Excel: Customer Segmentation in Banking** [\[GitHub\]](#): Analysed **1M+ rows** using clustering, optimizing marketing strategies through behaviour-based segmentation.

Data Analytics Internship Project - LearnNex - December 2024 – February 2025

- Delivered **5+** cross-functional data analytics projects, reducing manual report generation by **40%** and accelerating insight delivery timelines.
 - Streamlined **2M+ large-scale financial transaction records**, uncovering behavioural patterns that optimized client strategies by **15%**.
 - Deployed **data analysis and visualization techniques**, ensuring **100% on-time project completion** while **reducing manual data processing**.
-

Experience

Audit Division – Basu Chanchani & Deb - February 2021 to June 2025

- Spearheaded audits for **65+ MNCs across India, UAE & Europe**, uncovering compliance gaps in **30K+ transactions** and improving reporting accuracy by **30%**.
 - Performed **7+ financial reporting reviews** ensuring alignment with global standards such as **IFRS for international clients** in **India, UAE & Europe**.
 - Supported **variance analysis** and reporting by extracting key financial figures, **KPIs like Revenue, Net Income, and EPS** from client reports.
 - Executed **50+ tax audits and filings**; collaborated on **global corporate financial reporting** for overseas clients.
 - Handled transaction-based activities including **reconciliations, ledger verification and system-to-system balancing**.
-

Education

- **Masters of Business Administration – Data Science**
Amity University Online – June 2025
- **Bachelors of Commerce (Hons) – Finance**
University of Calcutta - October 2020

Certificates

- *Power BI Data Analytics for All Levels* - Codebasics
- *Google Cloud - Modernizing Data Lakes and Data Warehouses*
- *IBM - Data Visualization and Dashboards with Excel and Cognos*
- *IBM - Introduction to R Programming for Data Science*
- *Excel: Mother of Business Intelligence* – Codebasics
