

PALLAVI DASARI

Hyderabad, Telangana, India | +91-9030311233 | dasaripallavi2113@gmail.com | <https://www.linkedin.com/in/dasari-pallavi/>

EDUCATION

MALLA REDDY INSTITUTE OF TECHNOLOGY AND SCIENCE, JNTUH

Hyderabad, Telangana, India

Bachelor of Technology

July 2018 – August 2022

Stream in Computer Science Engineering

Cumulative GPA: 6.61/10

Relevant Coursework: Operating Systems; Cryptocurrency; Data Structures & Algorithms; Software Engineering; Cloud Technologies (Basics of Microsoft AWS, Google cloud Storage, Data Warehouse, DevOps)

TOPPERS JUNIOR COLLEGE

Telangana State Board of Intermediate Education in MPC

Hyderabad, Telangana, India

June 2016 – May 2018

INTERNSHIP

DETECTION OF FAKE AND CLONE ACCOUNTS IN TWITTER USING CLASSIFICATIONS AND MEASURED ALGORITHMS

(Lasya Infotech PVT. Limited Solutions company):

Hyderabad, Telangana, India

Machine Learning Intern

February 2022 – July 2022

- Engineered a Twitter account verification system, leveraging machine learning to identify fraudulent and duplicate accounts, strengthening platform integrity
- Executed classification algorithms using Python, pandas, & scikit-learn frameworks, improving fake account detection
- Architected Support Vector Machine (SVM) models to enhance system performance by 15%, culminating in a prototype demonstration
- Implemented advanced natural language processing using keyword analysis, combining Support Vector Machines and Random Forest algorithms with cosine and Euclidean distance metrics

SKILLS

Technical Skills: Programming Languages (C/C++, Java, Python), DBMS, SQL (MySQL, PL/SQL, Mango DB); **Web Development** (HTML5/CSS3, JavaScript, React JS, Node JS); **Business Analytics, Data Analytics & Visualization** (Advance Excel, Power BI, Tableau); **Machine Learning & Artificial Intelligence** (Data Engineer & Science, ETL Pipelines, Prompt Engineer, Deep Learning) Big Data, IOT, Cyber Security, Blockchain, SDLC.

Soft Skills: Problem-Solving, Critical Thinking, Adaptability, Communication, Presentation skills, Time Management, Organization, Leadership Potential, Attention to Detail.

Libraries & Techniques: NumPy, Pandas, Scikit-learn, SciPy, Matplotlib, PLOTLY, TensorFlow, Neural Networks, NLP, Time Series Analysis, Anomaly Detection

Models & Tasks: ARIMA, SARIMA, SARIMAX, Image Processing, Sentiment Analysis

Languages & Platforms: Native in English, VS code, JUPYTER notebook, GITHUB, Linux.

PROJECTS

CYBER CRIME DETECTION USING MACHINE LEARNING TECHNIQUES

Hyderabad, Telangana, India

Cyber Threats Project (Mini Project):

August 2021 – January 2022

- Developed a cybercrime detection system, increasing detection accuracy by 20% and reducing system vulnerabilities
- Applied GMM and K-Means clustering techniques for unsupervised pattern detection, attaining an accuracy rate of 76.56% and improving threat analysis

SOCIAL ANALYSIS INFLUENCER USING MACHINE LEARNING TECHNIQUES

Hyderabad, Telangana, India

Machine Learning Project:

August 2023 – October 2023

- Engineered predictive models to analyse social media trends, increasing accuracy and identifying key influencers to drive targeted strategies

- Developed automated dashboards using Python and Tableau to visualize influencer impact, enabling data-driven insights for e-commerce performance analysis
- Implemented Python-based workflows for synthetic e-commerce data generation, leveraging K-Means Means clustering and the APRIORI algorithm for pattern discovery and customer segmentation.

ANALYSIS SYNTHETIC E-COMMERCE DATA USING MACHINE LEARNING

Hyderabad, Telangana, India

Machine Learning Project:

November 2023 – January 2024

- Applied K-Means clustering & the APRIORI algorithm to evaluate e-commerce data, attaining 92% accuracy in customer segmentation and product recommendations
- Generated and processed large scale synthetic datasets using Python libraries such as Faker and Pandas, ensuring high-quality data for analysis and decision-making
- Designed 3D visualizations using PCA and PLOTLY, achieving 90% precision in illustrating customer behaviours to support strategic business decisions

WEB- BASED DIVERGING BAR CHART APPLICATION

Hyderabad, Telangana, India

Web Development Project:

March 2024 – May 2024

- Built interactive visualizations using Chart.js, JavaScript, HTML, and CSS to create diverging bar charts, improving data clarity by 30% with intuitive designs.
- Incorporated responsive design principles to ensure mobile compatibility and cross-browser support, boosting the user experience by 25% through flexible and adaptive layouts.
- Optimized data visualizations using JavaScript to increase user engagement, enhancing interactivity by 40% through interactive stacked bar charts, custom tooltips, and tailored axis configurations.

NETFLIX LANDING PAGE DEVELOPMENT

Hyderabad, Telangana, India

Web Development Project:

June 2024 – August 2024

- Constructed a responsive landing page inspired by Netflix, using HTML5, CSS3, and JavaScript, ensuring cross-device compatibility and boosting conversion rates by 15%
- Added a background video with autoplay, mute, and loop features to enhance visual appeal, driving a 20% increase in user engagement.
- Modified the fixed navigation bar and introduced interactive hover effects, increasing "Sign In" button interactions by 30%.

REAL-TIME WHETHER MONITORING SYSTEM

Hyderabad, Telangana, India

Data Analytics & Data Engineer

September 2024 – November 2025

- Deployed and designed a real-time weather data processing system using Python and Power BI, enhancing data accuracy by 40% and delivering actionable insights for decision-making.
- Introduced an automated data collection system, retrieving data from the Open Weather Map API every 10 minutes, capturing over 500 data points monthly for consistent analysis.
- Engineered interactive weather dashboards in Power BI, enabling stakeholders to monitor weather parameters (temperature, humidity, wind speed) with 95% accuracy, streamlining decision-making processes.

CERTIFICATIONS

- | | |
|---|----------------------------|
| • Generative AI in INEURON | May 2024 – July 2024 |
| • Data Analytics Essentials in CISCO Networking Academy | March 2024 – May 2024 |
| • Web Technologies, MySQL, Advance java, Spring Boot & Frameworks in J' Spiders Institute | September 2022 – July 2023 |

ACHIVEMENTS

- Founded the first Business Series to organize science training for 500 students in STEM activities
- Executed and promoted 10+ quarterly networking events, attracting 300+ participants at three universities
- AI Tools Workshop by BE10X and ML Workshop by Syntax Sarcasm
- Head of Technical fest Events from Computer Society of India (CSI) and Institute of Electric Electronics Engineer
- Committee Member from COMMUNITY SERVICE PROJECT (STREET CAUSE)
