PROFILE SUMMARY

Business Intelligence Specialist with around 2 years of experience as a Data Analyst, adept at creating impactful BI solutions using Power BI, SQL, and Advanced Excel. Skilled in data modeling, interactive dashboard development, and translating business requirements into actionable insights. Experienced in ensuring data security, optimizing performance, and delivering value-driven analytics.

SKILLS

Advanced Excel | SQL | Python | Power BI | Power BI Service | Dax | Power Query | Microsoft Fabric (Beginner) | Data Analysis | Data Modeling | ETL | Data Visualization | Performance Optimization | Power Automate | Jira

EXPERIENCE

Data Analyst | Global Business Infotech Solutions, Pune | Sep 2023 – July 2025

Delivered specialized Power BI solutions with interactive dashboards across various domains, leveraging expertise in data modeling, DAX, Power Query, and Power BI Service. Enabled secure, optimized reporting and promoted cross-team collaboration through shared workspaces for streamlined analysis.

#PROJECT 1: INA Real-Time Efficiency Dashboard

Client : Welspun India Ltd. (Anjar, Gujrat)
Role : Power BI Developer
BI Tool : Power BI
Data Source : MS SQL Server

Responsibilities:

- Real-Time Efficiency Monitoring:** Tracked machine and operator efficiency with up-to-the-minute data for productivity management.
- MS SQL Server Integration:** Connected Power BI to MS SQL Server for reliable, real-time performance metrics.
- Automated Data Updates:** Power Automate to refresh dashboard data every 5 minutes, ensuring up-to-date insights.
- Planned vs. Actual Efficiency Analysis:** Compared planned targets with actual performance to identify and address discrepancies.
- Key KPI Tracking:** Monitored essential metrics like cycle time, downtime, and production yield to improve operational efficiency.
- Trend Analysis and Alerts:** Visualized efficiency trends over time and flagged deviations for prompt corrective actions.

#PROJECT 2: Sales Dashboard

Client : Sanathan Textiles Ltd. (Lower Parel, Mumbai)
Role : Power BI Developer
BI Tool : Power BI
Data Source : MS-SQL Database, Share Point

Responsibilities:

- Data Integration with SQL Server and SharePoint:** Seamlessly connected Power BI with SQL Server and SharePoint for real-time data access and enhanced analytical capabilities.
- Interactive Visualizations and Analysis:** Enabled in-depth exploration of key metrics like sales, stock, and contracts with drill-down and dynamic filtering options.
- Division Comparison and KPI Tracking:** Compared performance across divisions while tracking critical KPIs such as sales volume, pricing accuracy, and stock levels.
- Trend Analysis for Improvement:** Analyzed historical data to identify patterns and support strategies for continuous operational improvement.
- Automated Daily Notifications:** Implemented Power Automate to deliver daily email updates with key metrics and reports for streamlined workflows.

#PROJECT 3: Stock & Consumption Dashboard

Client : Aditya Birla Yarn (Indonesia, Remote)
Role : Power BI Developer
BI Tool : Power BI
Data Source : MS-SQL Database

Responsibilities:

- Real-Time MS-SQL Database Integration:** Enabled live data access for accurate stock levels and consumption analysis.
- Scheduled Data Refresh:** Automated data updates ensure users access the latest inventory information without manual intervention.

- **Consumption Trend Analysis:** Identified fast and slow-moving items for data-driven restocking and demand forecasting.
- **Stock Coverage Insights:** Compared actual stock days with target levels to align inventory with budgeted plans.
- **Trend Analysis for Forecasting:** Visualized historical patterns to forecast inventory needs and improve reorder planning.
- **KPI and Trend Visualization:** Tracked key metrics and historical trends to optimize inventory management and enhance planning accuracy.
- **Visualization of Key Inventory Metrics:** The dashboard visualizes critical metrics, including total stock, average consumption, stock turnover rate, and days on hand, giving users a comprehensive view of inventory health and performance.

#PROJECT 4: FDIO Eximin Dashboard

Client : Mahindra & Mahindra LTD (Pune, On-Site)
Role : Power BI Developer
BI Tool : Power BI
Data Source : MS-SQL Database, SharePoint

Responsibilities:

- **FDIO Eximin:** Developed for Farm Division International Operations to analyze market performance across 60 countries.
- **Competitor Analysis:** Compared Mahindra tractor sales volumes, HP categorization, and shipment modes with competitors.
- **Yearly Sales Comparison:** Analyzed sales volumes for the current fiscal year, previous fiscal year, and year-over-year trends.
- **Region-Wise Performance:** Evaluated sales quantities (QTD, YTD, and percentages) while highlighting target regions.
- **Market Share Analysis:** Assessed region-wise market presence and Mahindra’s positioning against other brands.
- **Growth and Opportunity Analysis:** Tracked brand growth, identified top-performing countries, and created opportunity reports for untapped markets.

#PROJECT 5: CPT Dashboard

Client : Mahindra & Mahindra LTD (Pune, On-Site)
Role : Power BI Developer
BI Tool : Power BI
Data Source : MS-SQL Database, SharePoint

Responsibilities:

- **Cost Per Tractor (CPT) Analysis:** Focused on calculating CPT metrics to evaluate cost efficiency per unit.
- **Data Integration with MS SQL, SharePoint:** Utilized Power BI to fetch and analyze data from multiple sources for comprehensive reporting.
- **ROW and MAGNA Reports:** Developed reports detailing global performance (excluding the USA) and USA-specific insights.
- **Yearly Cost Comparison:** Compared unit costs across the years, with a focus on previous vs. current year analysis.
- **Part-Wise Analysis:** Provided detailed insights into parts descriptions, cost, production, and sales data.
- **Sales, Revenue, and Warranty Analysis:** Calculated sales, revenue, and warranty costs per part, enhancing decision-making and cost management.

Data Analyst Intern | AI Variant, Remote | Oct 2022 - April 2023

EDUCATION

- Bachelor of Science in Chemistry | KBC North Maharashtra University, Jalgaon.
- Diploma In Fire & Safety Engineering | MSBTE

CERTIFICATIONS

- Data Analyst Certification - ExcelR Solution, Thane (Mumbai).
- IBM Data Visualization.
- CISCO Data Analytics.
