WORK EXPERIENCE

Business Analyst

E-Sutra Technologies, Delhi, India

Apr 2025 – Present

- Conducted stakeholder interviews and market research to document business requirements, reducing iteration cycles by 30%.
- Translated product needs into 30+ actionable user stories in Jira, streamlining collaboration across design, dev and marketing teams.
- Maintained and prioritized product backlog, coordinated sprint planning, and improved sprint delivery predictability by 25%.
- Participated in Agile ceremonies to resolve blockers and enhance feature rollout timelines.
- Co-created wireframes and product roadmaps with UI/UX designers, improving user satisfaction based on feedback.
- Supported market strategies, identifying feature gaps, and assessing competitor benchmarks.

Business Analyst

Synokem Lifesciences, Haridwar, India

Jan 2024 – Feb 2025

- Collected business requirements from R&D and QA teams for product development and documentation.
- Created reports and dashboards in Excel to track inventory, expiry dates, and QC data.
- Wrote BRDs and user stories to support digital process improvements.
- Coordinated purchase orders, tracked inventory levels, and maintained logs for product expiry management.
- Conducted market analysis and prepared performance summaries to support product development.
- Coordinated cross-functional project deliverables and maintained stakeholder communication logs.

PROJECTS

HR Analytics Dashboard | SQL, Power BI

- Developed interactive Power BI dashboards to track employee attrition KPIs.
- Performed SQL-based EDA to structure and perform data cleaning.
- Presented findings with policy suggestions that improved retention by targeting high-risk departments.

Sales Performance Analysis | Excel, Pivot Tables

- Evaluated regional sales data from bike purchase logs.
- Created Excel dashboards with pivot tables to highlight customer risk profiles and sales trends.
- Proposed optimization strategies that reduced high-risk customer segments by 12%.
