Education

University of Delhi

2020 – 2023

Business Economics with a minor in Computer Science.

- CGPA: 8.23/10.0 ([view result](#) 📄)
- **Main Coursework:** Business Analytics, Economics, Python, MySQL, Econometrics, etc.

Published: Client-Centric Data Science website — DataTrendX.com

Built a professional portfolio website to showcase data science projects with video demos and integrated a secure download system for clients to access code and deliverables. [Datatrendx.com](#) 📄

AUG 2024 - Continue

Internship

Data Scientist

Sep 2023 – Mar 2024

AIvariant.com

- Completed a 6-month hands-on internship in Data Science, focusing on data cleaning, EDA, feature engineering, and predictive modelling using Python libraries like Pandas, Scikit-learn, and Matplotlib.
- Gained practical experience building machine learning models, performing data analysis, and delivering insightful visualisations for real-world datasets.

Professional Training: Data Science & Digital Analytics

DATA SCIENCE – EXCELR

Aug 2023 – Dec 2023

- Completed a rigorous Data Science certification with hands-on projects, mastering Python, ML libraries, and real-world predictive modelling techniques.

GOOGLE ADs, MARKETING, & GA4 - GOOGLE SKILLSHOP

June 2025 – July 2025

- Skilled in event-based tracking, funnel analysis, and ad performance optimisation using smart bidding, A/B testing, and cross-format strategies to maximise ROI.

Key Projects in Data Science, Analytics, and Business Intelligence

British Airways Data Science Job Simulation on Forage ([View](#)) 📄

July 2025

- Completed British Airways Data Science simulation by scraping reviews, analysing customer behaviour, and building a predictive model to drive business insights.

Accenture Nordics Consultant Job Simulation on Forage ([View](#)) 📄

July 2025

- Completed a consultant simulation for a healthcare app, analysing data to suggest UX improvements while managing client issues and prioritising strategic initiatives.

SQL Database Cab Bookings - Business Analysis ([View](#)) 📄

June 2025 - July 2025

- Cab booking data analysed using SQL to uncover customer behaviour, booking trends, cancellations, and actionable business insights.
- Tools used: MySQL / PostgreSQL (compatible SQL), DB Browser.

Brain Tumour MRI Detection - Deep Learning classification ([View](#)) 📄

May 2025 - June 2025

- AI-based system for fast and accurate brain tumour classification from MRI scans, helping neuro oncology diagnostics and clinical workflows.
- Tools used: Django, PyTorch, SQLite, DenseNet, Xception, MobileNet, real-time AI pipeline.

Driver Drowsiness Detection — AI & Vision Real-Time Safety ([View](#)) 📄

Mar 2025 - April 2025

- The real-time AI system detects drowsiness using webcams by tracking the eye, mouth, and head. Alerts users instantly through a simple Tkinter GUI.
- Tools used: Tkinter, OpenCV, dlib, playsound, NumPy, SciPy, imutils, HTML/CSS/JS

VIEW ALL 10+ PROJECTS OF DATA SCIENCE AND ANALYSIS, etc. ([My Website](#)) 📄

Technical Skills & Certifications

Skills & Languages: Python, Algorithms, Data Visualisation, HTML/CSS, Django, VS Code, Machine Learning, Deep Learning, Statistical Analysis, Business Analysis, MS Excel, Google Ads, Google Analytics

Technologies: .NET, Microsoft SQL Server, XCode, Interface Builder, Microsoft Office Suite (Excel, Word, PowerPoint).

Certifications: Google Data Analytics Certificate. ([View List](#)) 📄
