

PROFILE

I'm a B.Tech graduate in Computer Science with hands-on experience in backend development and AI-based solutions. I've built full-stack applications using Java Spring Boot and Python FastAPI, implemented LLM-powered features like semantic search, and developed scalable REST APIs. My projects include facial expression recognition for medical use, plant disease detection using CNNs, and interactive dashboards for performance analysis. I am looking for an opportunity to contribute to real-world tech projects while continuing to grow and learn.

EDUCATION

MIT ADT University, MIT School of Computing B. Tech in Computer Science and Engineering – 8 CGPA – Merit Scholar	Pune, IN May 2025
DPS Bopal (CBSE) Higher Secondary (12th) PCM - 89%	Ahmedabad, IN May 2021
DPS Bopal (CBSE) Secondary (10th) - 91%	Ahmedabad, IN May 2019

SKILLS

- **Programming:** Java, Python, SQL, HTML/CSS, JavaScript, C/C++, R, NodeJS, ExpressJS, Salesforce, AWS, Azure, SpringBoot, Hibernate
- **Tools & Technologies:** Django, MySQL, PostgreSQL, Chart.js, Power BI, Excel, Pandas, MongoDB, Postman
- **Concepts:** Data Analysis, Machine Learning, Web Scraping, Prompt Engineering, AI Integration, Software Security, Data Visualization, Exploratory Data Analysis (EDA), Hypothesis Testing, ML Modelling.
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Critical Thinking, Adaptability, Time Management, Creativity.

PROFESSIONAL EXPERIENCE

AI Intern at Enigma Solutions LLP (Pune)	Jan 2025 – July 2025
• Developed and integrated AI-powered features into a no-code enterprise automation platform, boosting intelligent search efficiency by 40% using semantic search with FastText and GloVe vector embeddings. • Designed and deployed RESTful APIs using FastAPI and MongoDB, improving real-time data retrieval and processing performance by 30%. • Contributed to the architecture of a retrieval-augmented generation (RAG) pipeline combining LLMs with vector databases to enable smarter enterprise document search. • Optimized backend services for scalability and reliability, reducing latency in data-serving endpoints by 25% during internal performance testing. • Gained hands-on experience with Microsoft Azure, deploying AI workflows and managing cloud-based infrastructure for production-ready features.	
Data Science Intern at Prodigy InfoTech (Remote)	March 2024 – May 2024
• Applied supervised and unsupervised machine learning algorithms to structured and unstructured datasets, improving prediction accuracy for classification tasks by ~20% in internal evaluations. • Created interactive data visualizations using Python (Matplotlib, Seaborn, Plotly) to highlight key trends and patterns, supporting actionable decision-making for project case studies. • Implemented AI-driven data preprocessing techniques (feature scaling, encoding, outlier treatment), reducing model training time by 30%. • Collaborated with a virtual team on end-to-end project development, including EDA, model building, and performance evaluation.	

PROJECTS

Plant Disease Detection Using AI Key Skills: Python, CNN, Computer Vision, Deep Learning, TensorFlow, Keras
• Built a CNN-based model in Python to classify plant leaf diseases from image data with high accuracy. • Applied image preprocessing and augmentation techniques to improve model robustness. • Achieved 90%+ accuracy on test data, enabling early and reliable disease identification.
AI-Based Machine Learning Model for Facial Expressions Key Skills: Python, AI/ML, Facial Recognition, Data Analysis
• Developed a Python-based model to detect and classify facial expressions for potential medical applications. • Utilized facial landmark detection and emotion classification algorithms to analyze patient data. • Enabled automated analysis to assist in early diagnosis of emotional or neurological conditions. • Research Paper - https://www.jptcp.com/index.php/jptcp/article/view/3514
Smart Ticket Booking System Key Skills: Java, Spring Boot, REST APIs, MySQL, HTML, CSS, JavaScript
• Built a full-stack ticket booking web app using Java Spring Boot for backend and MySQL for database management. • Designed RESTful APIs to handle user registration, booking flow, and cancellation logic. • Developed a responsive UI with HTML, CSS, and JavaScript ensuring seamless user experience across devices.

Certifications

- Google's Foundation: Data Analysis.
- Exploratory Data Analysis for ML-IBM.
- Power BI for Beginners – Skillsup.
- AWS Academy Graduate - AWS Academy Cloud Foundations.
