Profile Summary

Certified Data Analyst skilled in SQL, Python, Excel, and Power BI, with experience in data cleaning, analysis, and visualization. Proven track record in delivering actionable insights through projects in healthcare, retail, and digital payments.

Experience

Outlier ai

Oct 2024 – Present

Prompt Engineer

Oakland, US

- Designed and optimized prompts for large language models (LLMs) to improve output accuracy, coherence, and task alignment.
- Annotated diverse datasets and evaluated LLM outputs to support training and fine-tuning of generative AI models.

Meta Scifor Technologies

Nov 2023 – Nov 2024

Machine Learning Engineer

Bangalore , Karnataka

- Developed machine learning models using Python, TensorFlow, and Scikit-Learn, focusing on data preprocessing, feature engineering, and exploratory data analysis.
- Evaluated model performance and optimized algorithms, improving accuracy upto 95%

Projects

US Healthcare Analysis | *Excel* — Github

October 2024

- Analyzed patient admission data to identify the top 3 medical conditions—Hypertension, Obesity, and Asthma—driving 65% of hospital visits across all age groups.
- Conducted demographic segmentation, showing that Obesity rates spike in Middle-aged Females, influencing wellness program design.
- Validated insurance, hospital, and admission-type data with 97% accuracy, ensuring reliability for decision-making.

Retail Sales and Customer Behavior Analysis | *SQL* — Github

December 2024

- Conducted data cleaning and exploratory analysis using SQL, ensuring high data quality and actionable insights.
- Identified high and low sales products, leading to a 15 percent improvement in inventory turnover and targeted marketing strategies.
- Developed customer segments (No Orders, Low, Mid, High Value) for personalized marketing, increasing campaign effectiveness by 25%.
- Analyzed customer behavior, boosting repeat purchase rates by 20% and enhancing customer loyalty.

PhonePe Digital Payments Analysis | *Python* — Github

January 2025

- Analyzed PhonePe's state-wise and district-wise UPI transaction data to uncover key regional trends in digital payments across India.
- Identified the top 5 states contributing to over 45% of total transactions, while the bottom 5 states accounted for just 5%, guiding market focus.
- Found that states with a user-to-population ratio over 80% had 20% higher transaction volume, supporting targeted user acquisition strategies.

Key Skills

Data Analysis Tools: Python (pandas, numpy), Excel, Power BI

Concept Knowledge: Data Analysis, Data Cleaning and Pre-processing, Statistical Analysis, A/B Testing, Data Wrangling, Database Design and Querying

Database Management: SQL, Postgres SQL

Soft Skills: Attention to Detail, Communication and Presentation Skills, Analytical Thinking.

Education

Vellore Institute of Technology (CGPA: 7.78)

2019 – 2024

Integrated Mtech Specialization in Data Science

Vellore, TamilNadu

Training and Certifications

Coding Ninjas

Mar 2024 – Mar 2025

Data Analytics

Certificate Link

- Leveraged Python and Excel for comprehensive data analysis tasks effectively.
- Utilized Excel for data organization and reporting effectively.
- Utilized SQL for efficient data extraction and Power BI for creating interactive dashboards to drive actionable insights.
