SUMMARY

Data Science graduate with hands-on experience in data analysis, machine learning, and dashboard development. Skilled in Python, SQL, Power BI, and statistical modeling to derive actionable insights and solve real-world problems.

EDUCATION

Program/Course	Institution/Board	%/CGPA	Year Passing
BSc in Data Science	Department of Technology (SPPU), Pune	9.04	2025
HSC	Kendriya Vidyalaya	82.8%	2022
SSC	Kendriya Vidyalaya	84%	2020

SKILLS

- **Programming Languages:** Python, SQL.
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Keras, TensorFlow, PyTorch.
- **Tools:** Excel, Power BI, Jupyter Notebooks.
- **Soft Skills:** Problem-Solving, Communication, Teamwork.

Experience

Data Analyst Intern

Remote | June 2025

Elevate Labs (Skill India/NAPS & Udyam-MSME registered)

- Conducted data cleaning and preprocessing to prepare structured datasets for analysis.
- Performed exploratory data analysis (EDA) using Excel and Power BI to uncover key trends.
- Created dynamic Power BI dashboards for visualizing performance metrics and insights.
- Collaborated with the analytics team to derive actionable insights from customer and sales data.
- Delivered a capstone project that showcased data-driven recommendations through interactive reporting.

Data Intern – Guinness World Record Project

Pune, India | Dec 2024

Savitribai Phule Pune University, Dept. of Technology

- Contributed to the **Guinness World Record** project for the "Largest Online Photo Album of Books"
- **Data Collection:** Acquired book cover photos for the record database with high accuracy
- **Data Coordination:** Collaborated with cross-functional teams to streamline data gathering
- **Data Cleaning & Preprocessing:** Removed duplicates, corrected inconsistencies, and ensured structured formatting
- **Data Management:** Uploaded, organized, and integrated final datasets into the system
- Demonstrated strong analytical thinking, teamwork, and attention to detail under tight deadlines

PROJECTS

Multiple Disease Prediction System (Python | ML | Streamlit)

January 2025 - February 2025

- Developed a Streamlit web app to predict Diabetes, Heart Disease, and Parkinson’s Disease using machine learning models trained on real-world datasets.
- Utilized Scikit-learn for model building and evaluation, achieving reliable classification performance across multiple health conditions.
- Implemented data preprocessing techniques such as feature scaling and label encoding to improve model accuracy and consistency.
- Designed a user-friendly interface enabling users to input medical data and receive instant disease predictions from integrated models.

Movie Recommender System Project (Python | ML | Flask)

October 2024 - November 2024

- Developed a Content-Based Movie Recommender System that recommends movies to users based on the similarity of their content (genre, description, actors, etc.).
- Implemented TF-IDF Vectorization to analyze movie descriptions and cosine similarity to compare and recommend movies based on text features.
- Processed and cleaned movie data using Pandas and NumPy to prepare datasets for model training.
- Built a system that can generate personalized movie recommendations for users based on previously watched or liked movies, improving user experience and engagement.

Face and Eye Detection (Python | Computer Vision- OpenCV)

March 2024

- Developed a real-time face and eye detection system using OpenCV and Haar Cascade classifiers.
- Implemented object detection techniques to identify and track facial features in live video feeds.
- Utilized Python and computer vision algorithms for image processing and detection.
- Integrated OpenCV's Haar Cascade models for accurate face and eye recognition.
- Processed video streams using cv2.VideoCapture() and displayed detected features with bounding boxes.

Diwali Sales Analysis Project (Python - NumPy, Pandas, Matplotlib, Seaborn)

September 2023

- Performed Exploratory Data Analysis (EDA) on Diwali sales data, utilizing Pandas, NumPy, Matplotlib, and Seaborn to clean and manipulate data, uncovering key insights about customer behavior and sales trends.
- Analyzed customer demographics (age, gender, occupation, state) to identify target segments and improve marketing efforts, leading to a better customer experience and increased engagement.
- Identified top-selling product categories and individual products, providing recommendations for inventory planning and demand forecasting.
- Delivered actionable insights through data visualizations, contributing to improved sales strategies, customer targeting, and inventory management for the Diwali season.

CERTIFICATES

Introduction to Google Analytics – Google

- Gained expertise in web analytics, data tracking, and performance measurement.
- Learned to analyze website traffic and user behavior for data-driven decision-making.

Introduction to SQL – Simplilearn SkillUp

- Learned to write basic to intermediate SQL queries for data retrieval and manipulation.
- Gained hands-on experience with databases.

Cloud Computing – Turnip Innovations

- Explored cloud architectures, deployment models, and virtualization concepts.
- Understood cloud services (IaaS, PaaS, SaaS) and their applications in industry.

AI Tool Workshop – be10x

- Hands-on experience with AI tools for automation and productivity enhancement.
- Explored generative AI, prompt engineering, and real-world AI applications.

Volunteer Experience

Event Volunteer | 4th Educational Working Group Meeting, G-20 Pune

- Assisted in organizing and coordinating event activities.
- Managed logistics and supported delegates.
- Facilitated smooth communication between teams and attendees.

Mera Mati Mera Desh Campaign (Guinness World Record Event)

- Contributed to the **Guinness World Record** for the largest selfie campaign under the Mera Mati Mera Desh initiative.
- Successfully Preprocessed large datasets for MMMD.
