

PRABHAT ASAI

Data Analyst

📞 7840936882 ✉ prabhataasai10@gmail.com 🔗 [LinkedIn](#) 🔗 [LeetCode](#) ⭐ [Portfolio](#) 📍 Pune, Maharashtra

SUMMARY

Detail-oriented data analyst skilled in Excel, SQL, Python, and Power BI, with a strong focus on data cleaning, analysis, and visualization to deliver actionable business insights and support data-driven decision-making.

INTERNSHIPS

Data Analyst Intern

Mind Spark Technology

📅 08/2024 - 06/2025 📍 Pune, India

Mind Spark Technology provides technology and data-driven solutions to help businesses enhance efficiency and decision-making.

- Collected, cleaned, and analyzed large datasets using Excel to identify business trends and support data-driven reporting.
- Designed and executed SQL queries to extract, transform, and aggregate data from relational databases for analysis.
- Developed interactive Power BI dashboards to visualize KPIs, operational metrics, and business performance insights.
- Automated repetitive data processing tasks using Python (Pandas, NumPy), improving efficiency and reducing manual effort.

PROJECTS

Sales Performance Analysis Dashboard

Power BI, Excel, DAX

- Designed and implemented an interactive dashboard analyzing over 50,000 sales transactions from multiple Excel data sources.
- Used DAX to calculate key KPIs such as monthly revenue, year-over-year growth (12%), and product-wise profitability.
- Built dynamic slicers, drill-through pages, and trend visualizations, enabling leadership to quickly identify high-performing regions and product categories.

Customer Churn Prediction

Python (Pandas, NumPy, scikit-learn), SQL

- Built a predictive model using logistic regression to identify churn risk.
- Developed and deployed a logistic regression model predicting churn with approximately 78% accuracy on validation data.
- Performed feature engineering on customer tenure, usage patterns, and support interactions extracted via complex SQL joins from a database of over 30,000 customer records.
- Generated actionable insights, helping the team target at-risk customers and reduce churn.

E-commerce Order Data Analysis

Excel, Python

- Analyzed 20k+ order records; created PivotTables and charts to highlight top products, seasonal trends, and customer segments.
- Analyzed 20,000+ order transactions to identify peak seasons, top 10% revenue-generating SKUs, and customer segments contributing to approximately 60% of total sales.
- Automated weekly Excel dashboards using PivotTables and VBA macros, reducing manual reporting time by approximately 40%.
- Presented findings to stakeholders to guide targeted promotions and inventory planning.

SKILLS

Data Analysis & Visualization

Power BI, Matplotlib, Seaborn

Programming

Python (Pandas, NumPy), Java

Database

SQL (MySQL / SQL Server)

Spreadsheet

Microsoft Excel (Pivot Tables, VLOOKUP, dashboards), MS Excel with AI, Advanced Excel, Excel VBA

Project Management & Version Control

JIRA, Git, GitHub

Others

Power Query, Data cleaning, Data modelling, EDA, Storytelling with data

EDUCATION

Post Graduation Diploma in Advanced Computing (PG-DAC)

Sunbeam

📅 04/2023 - 09/2023 📍 Pune, Maharashtra

BE in Information Technology

SAKEC

📅 08/2017 - 05/2022
📍 Mumbai, Maharashtra

GPA

7.80 / 10

TRAINING / COURSES

Data Analytic Job Simulation

Deloitte

Using Netflix Data to Master PowerBI

Coding Ninja

SQL Using AI Workshop

AI For Techies

Python 3.5 Training Course

EDUCBA

AI Tools & ChatGPT Workshop
