Data Analyst with 2+ years of experience in analytics, Proficient in SQL, Python, and Excel, with a strong foundation in statistical techniques and machine learning algorithms. Adept at analyzing large datasets, building predictive models, and developing dashboards to drive data-driven decision-making. Skilled in identifying process improvement opportunities and effectively communicating insights to stakeholders.

Professional Experience

Data Analyst | Verificent Technologies Pune

06/21-03/23

- Collected and analyzed large datasets to identify key business insights, improving decision-making processes.
- Developed and optimized machine learning models, including regression and decision trees, to predict customer behavior and assess risk.
- Created dashboards and reports using Tableau and Power BI to visualize performance metrics and track KPIs.
- Designed and maintained SQL queries for efficient data extraction, transformation, and loading (ETL) processes.
- Identified process improvements, increasing operational efficiency by 20%.
- Presented insights to stakeholders, influencing strategic decisions.

Data Analyst Intern

Internshala | Remote |

01/23 - 04/23

- Conducted in-depth data analysis using SQL to uncover trends and opportunities for business improvement.
- Developed Python scripts for process automation, reducing manual workload by 30%.
- Created reports for business units using SQL queries and data visualization tools, improving operational efficiency.

EDUCATION

Master of Computer Applications (MCA)

04/23 - 04/25

Dr. D Y Patil School of MCA, Pune

Bachelor of Computer Applications in Data Science

Ajeenkya D Y School of Engineering, Pune

08/18 - 05/24

Technical Skills

- **Languages:** Python, SQL
- **Tools & Technologies:** Power Bi, Jupyter Notebook, Automation Scripting, Agile Methodology, Machine Learning
- **Databases:** SQL Server, MySQL
- **Frameworks & Libraries:** Pandas, NumPy, Matplotlib, Power BI
- **Data Analysis:** Data Cleansing, Data Manipulation, Business Intelligence, Data wrangling
- **Database Concepts:** Star & Snowflake Schema, Fact & Dimensions, OLTP/OLAP
- **Querying & Reporting:** SQL Server Query Language, Database Views, Complex Joins
- **Data Formats:** JSON (Exploding JSON in Python)
- **Operating Systems:** Windows, Linux

ACADEMIC PROJECTS

- **Customer Churn Prediction:** Developed a logistic regression model to predict customer attrition, improving retention strategies.
- **Credit Risk Analysis:** Built a decision tree model to assess loan default risks and optimize credit approvals.
- **Market Trend Analysis:** Leveraged NLP techniques to analyze customer feedback and generate sentiment insights.
- **Movie Recommendation System:** Designed a personalized recommendation engine based on user preferences.
- **Real Estate Sales Power BI Dashboard:** Created an interactive dashboard to visualize sales data and enhance decision-making.

Certifications

MTA- Python Certificate

Google Analytics Certificate
