Experience

S3Infosoft

April 2025 – Present

AI/ML Engineer

Pune, India

- Developed intelligent document-aware chatbots for multiple domains using RAGFlow.io, enabling dynamic user interaction and precise context-based responses from ingested documents. Also, Built and fine-tuned Retrieval-Augmented Generation (RAG) pipelines with LangChain and integrated vector databases such as ChromaDB to support semantic retrieval, improving response accuracy and relevance in enterprise knowledge systems.

PwC Switzerland Power BI Job Simulation on Forage

Mar 2025 – Apr 2025

Power BI Developer

Remote

- Strengthened Power BI skills by creating insightful dashboards to meet client visualization needs.
- Demonstrated expertise in data visualization through the creation of Power BI dashboards that effectively conveyed KPIs, showcasing the ability to respond to client requests with well-designed solutions.
- Effectively analyzed HR data, identified gender balance issues, and communicated key insights to stakeholders.

Projects

Diversity & Inclusion Analytics Dashboard | Power BI, DAX, Excel

March 2025

- Designed and implemented a Power BI dashboard to track key diversity and inclusion KPIs across departments.
- Transformed raw Excel datasets into actionable insights using DAX calculations, data cleaning, and relationship modeling.
- Delivered interactive visual reports to HR teams, enabling data-driven decisions on workforce equity and representation.
- Enhanced stakeholder understanding of gender, ethnicity, and age trends through dynamic slicers and drill-downs.

Automated Business Loan Approval System | ML, Python, Pandas

Aug 2024 – Present

- Developed a machine learning system to enhance loan approval accuracy and efficiency using historical borrower data.
- Increased processing efficiency by 35% by automating manual approval workflows.
- Built an end-to-end machine learning pipeline leveraging PySpark and XGBoost.
- Created an interactive Tableau dashboard for visual insights into loan approval metrics.

ETL and Visualization of Bank Loan Data | AWS(S3), PySpark, Tableau

Aug 2024 – Present

- Designed a robust ETL pipeline for big data processing and visualization.
- Processed and transformed 1M+ data records, optimizing storage and retrieval in Amazon S3.
- Delivered actionable insights through a dynamic Tableau dashboard.

Technical Skills

Analytics and Statistics: SQL, Python, Regression, Classification, Clustering

Databases: MySQL, PostgreSQL, SQL Server

Data Visualization & Reporting: Tableau, Power BI, Matplotlib, Seaborn, Excel (Pivot Tables, VLOOKUP)

Cloud & automation: Amazon EC2, S3, Jupyter Notebook

Version Control & Tools: Visual Studio Code, Postman, Github, Docker, PowerPoint

Education

CDAC, Pune

Aug 2024

Post Graduation Diploma in Big Data Analytics (PGDBDA)

Pune, India

D.Y. Patil College of Engineering

Aug 2023

Bachelor of Engineering (BE) - Mechanical; CGPA: 9.06

Pune, India

Certificates

PwC Switzerland Power BI Completion Certificate

April 2025

Forage

India
