Summary

Enthusiastic Computer Science graduate with 6+ months of hands-on experience in Java development, Spring Boot, and MySQL. Proficient in frontend development with HTML, CSS, JavaScript and familiar with cloud technologies like Firebase. Strong understanding of SDLC, version control (Git), and Agile methodology. Quick learner with excellent problem-solving and communication skills.

Professional Experience

Software Developer Intern (6 Months)

Numetry Technologies
07/2024 – 01/2025 | Pune

- Contributed to the development and maintenance of web-based applications.
- Collaborated on designing and implementing scalable software solutions.
- Write clean, efficient, and maintainable code.
- Implemented frontend features and optimized user interfaces.
- Enhanced overall application performance.
- Continuously learned new frameworks and tools to stay updated with trends.
- Worked in Agile environment using JIRA for task tracking

Skills:

- **Programming Languages:** Java
- **Frameworks & Tools:** Spring, Spring Boot
- **Frontend Technologies:** HTML, CSS, JavaScript
- **Database:** MySQL(SQL Language)

Certificates

Core Java – IIT Bombay (Spoken Tutorial Program)

Completed a certified course covering fundamental Core Java concepts including object-oriented programming, exception handling and collections framework, conducted by IIT Bombay through the Spoken Tutorial Program.
Credits: 4 | Score: 90%

Employability Skill Program - Mahindra Pride Classroom, Naandi Foundation

Completed a training program focused on developing **soft skills**, including **communication, confidence building, presentation skills, teamwork**, and other essential professional competencies.

Cloud Certification: AWS Cloud Practitioner – In Progress

- Gaining foundational knowledge of AWS core services

Achievements

DIPEX 2024 State Level Project Competition

03/2024
Android Application - An App based Solution to Identify Disease in Plants/Crop
The Android Application that can detect disease in Plants/Crops by taking images through mobile device or by uploading it. The app uses advanced image recognition and machine learning algorithms to analyze photos of plants, diagnosing potential diseases and offering treatment recommendations.
• **Technology:** Android Studio, Firebase, Java Programming

WeCP – Problem Solving Badge

Awarded a badge for actively participating and solving real-world programming challenges on the WeCP platform, demonstrating strong analytical thinking and coding skills.

Skills

Communication (Verbal & Written) | Team Work |
Active Listening | Time Management | Attention to Detail |
Learning Enthusiast

Education

Karmaveer Bhaurao Patil College of Engineering, Satara.
BTECH Computer Science and Engineering
2020 – 2024
CGPA - 7.33

Yashwantrao Chavan Institute of Science (Autonomous), Satara.
Maharashtra HSC
2018 – 2020
Percentage - 59.23%

Chhatrapati Shahu Academy, Satara.
Maharashtra SSC
2018
Percentage - 81%

Technical Skills

Java Programming

OOPS - Object Oriented Programming | Multithreading |
Exception Handling | Collections Framework | JSP | JDBC |
JPA | Hibernate | Spring | Spring Boot

HTML5 | CSS | JavaScript | Familiar with Bootstrap

MongoDB

SQL Language (MYSQL Database)

Practice on MYSQL Workbench

Cloud: Firebase | Familiarity with AWS

Projects

Insurance Policy Management

Web Development Project

- Designed and implemented a **responsive user interface** for easy navigation.
- Allowed users to **view, update, and manage** their insurance policies.
- Focused on creating an **intuitive user experience** with clean layouts and clear actions.
- Used **HTML, CSS, JavaScript** and **PHP** to build dynamic and interactive pages.

An App based Solution to Identify Disease in Plants/Crops

Android Application

- Enabled users to **capture or upload images** of affected plants/crops.
- Used **image processing and machine learning** to detect possible diseases.
- Displayed **diagnosis results** along with **treatment recommendations**.
- Provided an easy-to-use, mobile-friendly interface for accessibility in rural areas.
- Aimed to assist in **early detection** to prevent crop loss and improve yield.
- Integrated with **cloud storage** for managing images and disease data.

Technologies Used:

- **Android Studio** – App development platform
- **Java** – Programming language
- **Cloud Technology** - Firebase (Realtime DB, Storage)
- **Machine Learning Algorithms** – For disease detection
- **XML** – UI design in Android

Tools

Development Tools

Eclipse | Spring Tool Suite4 (STS) | Android Studio | VS Code

Build & Deployment

Maven | Apache Tomcat

DataBase & Backend

MYSQL | Firebase

Version Control

Git | GitHub

API Testing

Postman
