- Utilized project management and team collaboration tools to streamline processes.

EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering

CGPA: 8.57

Amaravati, Andhra Pradesh, India

Sept 2020 – May 2024

PROJECTS

Invoice Management System

- Gathered business requirements and designed an invoice tracking system that eliminated manual entry and reduced billing errors by up to 70%.
- Collaborated with stakeholders to map workflows and developed a clean, intuitive UI that increased task completion speed by up to 60%.
- Engineered SQL-based data storage for improved traceability and significantly faster invoice record retrieval.
- Applied Agile methodologies, led functional testing, and ensured a smooth handoff with minimal post-deployment issues.

Quick Update Tool

- Built an internal automation tool to streamline weekly/monthly project status updates, reducing manual reporting effort by 80%.
- Defined project scope from scratch, developed a responsive UI with authentication, and managed the complete SDLC lifecycle.
- Implemented structured SQL-based data logging to maintain consistency and reduced misreporting incidents by 65%.
- Led functional and regression testing across Agile sprints, ensuring stable releases and cutting update-related errors by 90%.
